#### Performance Review of the Group

RHB Capital Group ("the Group") today reported a net profit of RM530.2 million in the first half of 2009, representing an increase of 7.4% as compared to RM493.5 million recorded in the corresponding period of 2008. Pre-tax profit improved by 6% to RM715.1 million. Earnings per share rose to 24.6 sen compared to 22.9 sen recorded for the same corresponding period of 2008.

The improved performance of the Group was primarily contributed by strong growth in net interest income, higher income from the Islamic banking business and higher write-back of impairment losses, partially offset by an increase in loan loss allowances and lowering other operating expenses.

For the first half of 2009, net interest income increased by RM77.7 million or 7% to RM1.2 billion due to an expansion in loan base by 2% from December 2008 and improved net interest margin. Income from the Islamic banking business was higher at RM161.7 million or 27% as compared to RM126.7 million recorded in the same period in 2008. The improved performance was attributable to a higher net profit income of RM20.5 million and higher gain from sale of securities of RM10.9 million.

Cost-to-income ratio improved to 40% from 42% recorded in the previous year's corresponding period.

Loan loss allowances increased by 20% to RM367.2 million during the first half of 2009, as compared to the previous year's corresponding period, due to prudent provisioning.

For the second quarter of 2009, the Group recorded a pre-tax profit of RM400.1 million or 27% higher as compared with RM315.0 million achieved in the first quarter of 2009. The strong performance was mainly attributable to lower other operating expenses by RM40.1 million and higher income from Islamic banking business by RM40.8 million.

For the first six months of 2009, the Group's gross loans, advances and financing increased by RM1.2 billion or 2% to reach RM64.3 billion as at 30 June 2009. The Group's domestic loans market share stood at 8.2% as at the end of June 2009. Loans growth was mainly channeled to the consumer and SME sectors, which advanced by 6% and 2% respectively.

Benefiting from an improving economic outlook, coupled by the Group's prudent lending policies and concerted efforts to improve collection and recovery, the Group's net NPL ratio was marginally higher by 0.28% to 2.52%, while loan loss coverage stood at 86% as at 30 June 2009. Total customers' deposits for the Group increased by RM3.9 billion or 5% to RM77.9 billion as at 30 June 2009 and this is largely contributed by the increase in fixed deposits by 6%. The Group's loans-to-deposits ratio healthily stood at 83% as at 30 June 2009. The Group's total assets stood at RM104.6 billion, while net assets per share rose to RM3.74 and shareholders' equity strengthened to RM8.1 billion as at 30 June 2009.

In view of the improved performance of the Group, the Board of Directors has proposed an interim dividend of 5.0 sen less 25% tax, amounting to RM80.8 million.
