ANNOUNCEMENT:

New security features for better protection on RHB Mobile Banking App

Dear Valued Customers,

Effective June 2025, RHB will be introducing an enhanced security feature that **detects security threats, including untrusted apps, malware and risky permission settings**, to help keep your online and mobile banking safe.

Your online and mobile banking access **may be temporarily interrupted** if a security threat is detected, alerting you to possible risks. You will only be able to proceed once the security threat is removed.

This is part of our continuous efforts and commitment to safeguard your accounts and data.

Thank you.
