AS ORDINARY BUSINESS:

Agenda 1: Audited Financial Statements Of The Company For The Financial Year Ended ("FYE") 31 December 2012 And The Directors' And Auditors' Reports Thereon

With the Members' consensus, the Audited Financial Statements together with the Directors' and Auditors' Reports thereon, which have been earlier circulated to the shareholders within the prescribed period, were taken as read.

In accordance with Section 169(1) of the Companies Act, the Directors' Report and Audited Financial Statements were laid before the Meeting for discussion. As the formal approval of the shareholders was not required for this agenda item, the matter was not put forward for voting.

The Chairman invited the Group Managing Director ("Group MD") to respond to the issues raised by the Minority Shareholder Watchdog Group ("MSWG") which were received by the Company via their letter dated 22 May 2013, as highlighted below:

1. Strategy/Financials

(i) MSWG noted that the Group had achieved commendable results in 2012 for each of its business activities/key operating entities under its commercial banking and investment banking group. Could the Board share on:

(a) Whether these achievements were within the set of Group Key Performance Indicators (“KPI”) targets set in 2012 and how do they fare and rank if benchmarked against its banking peers and competitors?

The Group MD confirmed that the Group achieved its financial year (“FY”) 2012 stated targets for loans and deposits growth as well as gross impaired loans ratio. However, Return On Equity (“ROE”), Return On Assets (“ROA”) and Cost to Income Ratio were affected by the issuance of new shares for the acquisition of OSK Investment Bank Berhad (“OSKIB”) which was completed on 9 November 2012 and the consolidation of its 2 months’ results and asset base. The Group also did not achieve its international contribution target given the delay in the proposed acquisition of PT Bank Mestika Dharma (“Bank Mestika”).

Details of the stated KPIs and achievements are as follows:

Top level indicators	Target 2012 (%)	Actual 2012 (%)
Loans Growth	>12.0	14.4
Deposits Growth	>12.0	19.3
Gross Impaired Loans Ratio	<3.0	2.99
ROE	>14.0	13.4
ROA	1.2	1.0
Cost to Income ratio	<44.0	47.5
International Contribution	10.0	6.0

(b) What are the Group's major KPI targets set for each of its subsidiaries, going forward?

The Group MD informed the meeting that the Group has set the following key performance targets for FY2013:-

Top level indicators	Target 2013 ^{N1} (%)
ROE	>13.0
Gross Impaired Loans Ratio	<2.9
Loans Growth	12.0
Deposits Growth	10.0
Cost to Income ratio	<50.0
International Contribution	10.0

Note:

N1: Target for 2013 is without Bank Mestika

RHB Bank Group shall remain the key contributor to the Group targets, with a lion share of over 90% of Group Profitability, whilst the balance shall be contributed by the combined RHB-OSK Investment Bank Group and RHB Insurance Berhad.

- (ii) *What is the status of the acquisition of Bank Mestika and the reasons, if any for the delay in completing the acquisition? In line with its overseas ambition, what are the remaining ASEAN markets the Group is considering in 2014/2015 and in which business segment/franchise the Group is targeting and why?*

The Group MD highlighted that the Group is currently awaiting Bank Negara Malaysia's approval for the proposed acquisition of Bank Mestika. The delay was mainly due to the several changes in the Indonesian regulations in relation to foreign shareholding ownership in the banking sector.

The Group is also currently exploring other potential opportunities to expand into Laos, Myanmar and the Philippines. The Group is also targeting the wholesale segments in the near term to facilitate RHB's client's expansion, capital and trade flows. Over the medium and longer term, the Group is looking at growing its retail and commercial segments.

- (iii) *Could the Board share on the tangible results achieved and the leverage/opportunities created from its acquisition of OSKIB in 2012 for the domestic and international operations, and the respective business segments? What are the Group's expectations and targets to further harness the assets of OSKIB in 2014/2015 and in which business segment/franchise the Group is targeting and why?*

The Group MD highlighted that the Group's 4th quarter ("Q4") of FY2012 non-interest income has registered a significant increase by 65% as compared with the 3rd quarter ("Q3") of FY2012. The ratio of non-interest income to total income has also increased significantly from 24% in Q3 FY2012 to 33% in Q4 FY2012 due mainly to the higher brokerage and fee income derived from the combined strength of RHB-OSK investment banking franchise. From the international front, the OSK international presence in Indonesia, Singapore and Hong Kong has enhanced significantly the Group's capital market capabilities in the region.

The Group expects to further benefit from revenue synergies by way of cross selling into the RHB and OSKIB customer base.

The Group expects to achieve total synergies of RM324 million over the next three years which will come from revenue, cost and funding synergies.

Notable deals completed by the RHB-OSK team include the Golden Assets International Finance Ltd RM5 billion Sukuk Musharakah Programme, Wilmar International Ltd US\$5 billion Medium Term Note Programme and First Resources Limited RM2 billion Islamic Medium Term Note Programme.

- (iv) *With the completion of the acquisition of OSKIB, could the Board share on the following:*
- (a) *Major post-merger integration issues which may impact in the area such as the Group's structure, manpower needs and asset.*
 - (b) *In addition, what is the impact on the Group's philosophy, management style being an institutional player against the makeup of OSKIB?*
 - (c) *Any near term negative surprises that could arise and impact the Group's bottom line?*

The Group MD responded that RHB Investment Bank Berhad ("RHB Investment Bank") and OSKIB had successfully completed Legal Day One on 13 April 2013. No major post-merger integration issue was noted.

The team from RHB Investment Bank and OSK Investment Bank have been working together as one team even before the completion of the transaction last year, and have closed several large transactions together. No major management or culture conflicts was noted.

There was no near term negative surprises other than that in the normal course of business that the Board was aware of.

- (v) *Could the Board elaborate on the measures taken to improve its "Other Operating Expenses" (page 153 of the Annual Report) e.g. rising cost-to-income ratio, higher personnel costs, etc.?*

The Group MD clarified that the Group is diligent in managing its cost base. The Group's cost to income ratio for FY2012 was in the mid-pack amongst its peer group in the industry. Personnel costs were higher for FY2012 partly due to the consolidation of personnel costs of 2,900 employees of OSKIB during the last quarter of the year. The overall cost base increase is also a reflection of the Group's continuous investment into people, process and system for future growth. Going forward, the Group shall continue to be diligent in managing its cost base whilst striving to further increase its revenue base particularly in the form of the less capital intensive fee base income.

- (vi) *Could the Board explain on the higher "Impairment allowance" of 1.6% against the previous year? Please elaborate on the categories/business segments affected and the measures taken to address the issues.*

The Group MD explained that the increase in impairment allowances was mainly due to delinquency of certain corporate and commercial accounts in the manufacturing and trading services segment. The Group has always been prudent in its credit assessment and underwriting standard, whilst practicing a strong credit management and recovery culture. The Group remained committed to uphold this standard in its future business underwriting.

2. Corporate Governance

MSWG would like the Board to consider publishing the minutes, discussion and voting results of the meeting in the Group's website in line with transparency and disclosure.

The Group MD highlighted that the Board has taken note of the above suggestion and will consider the publication of AGM minutes, discussion and voting results in the Group's website in future.

The Chairman then invited questions from the Members in relation to the Audited Financial Statements.

Mr Ng Aik Pheng sought the Board's clarification on the following issues:-

- (i) Commercial and trading setbacks recorded in FY2012;

- (ii) Inflation impact to the Group's increasing cost for FY2012 and the Group's action plan to address such impact; and
- (iii) Delay in acquisition of Bank Mestika.

The Chairman noted Mr Ng Aik Pheng's enquiries and clarified on the following:-

- (i) The commercial and trading setbacks are part of the lending business risks. For FY2012, the said setbacks were within the targeted gross impaired loan ratio (i.e. <3%). The Management will continue its efforts to further improve the same for FY2013.
- (ii) The increase in the Group's total costs of 21% for FY2012 was mainly attributable to the one-off acquisition and advisory cost as well as the higher cost structure of the merged investment banking group whilst the full year earnings potential of OSKIB has not been accounted, as the acquisition of OSKIB was completed towards the end of the financial year.
- (iii) As explained by the Group MD earlier, the acquisition of Bank Mestika is pending regulatory approval. The Management is closely pursuing the matter and expects to conclude the said transaction in 2013.

Mr Muniandy Karishnan shared with the Meeting his observation on the following matters and further sought the Board's confirmation/clarification on the same:-

- (i) The Company's dividend policy i.e whereby the payout ratio for the past 5 years was 30% per annum;
- (ii) The acceptance rate of the Company's previous Dividend Reinvestment Plan was only 65%. It is substantially lower than the acceptance rate of the other financial institution (i.e. more than 90%);
- (iii) The Group's targeted deposit growth for the FY2013 is 50% lower than the Group's deposit growth achieved in the last FY;
- (iv) Currently, it is widely reported that RHB Bank Berhad will be acquired by a third party. The shareholders should be informed on any potential merger and acquisition transaction in a timely manner; and
- (v) The Group should be more innovative in its products and services, especially the marketing approach to attract customers.

The Chairman noted Mr Muniandy Karishnan's observations and provided his clarification and views, as follows:-

- (i) The Company has adopted a dividend policy whereby the dividend payment is at a minimum payout ratio of 30% per annum. Any potential increase in the dividend payment will be recommended based on the Management's detailed assessment on numerous factors (e.g. regulatory requirement, capital requirement for the Group's future growth, etc.).
- (ii) The acceptance rate of the past few Dividend Reinvestment Plans of approximately 65% is mainly due to the non-participation of a major shareholder which preferred cash dividend.
- (iii) The Group's deposit and loan growth targets are set by the Management based among others on a thorough assessment on the expected competitive business environment as well as the Group's funding requirements. The Management will also cautiously manage the loan to deposit ratio for FY2013.

- (iv) The Group will not respond to any market rumour in respect of potential mergers and acquisitions. Nevertheless, the Group will make timely disclosure to the shareholders on the Group's corporate exercise, whenever necessary.
- (v) The Board was of the view that the Management has been quite innovative in developing its products and services. However, the Board agreed that it should enhance the Group's distribution channel. For example, approaching the customers in a more friendly and innovative way.

In response to Mr Tan Teong Huat's enquiry on the Group's historical cost to income ratio ("CIR") and net interest margin of RHB Bank Berhad, the Chairman informed the Meeting that the Group's CIR for the past 3 years was 40.5% (FY2010), 43.5% (FY2011) and 47.5% (FY2012). Upon the RHB-OSK merger, the Group is expected to be more competitive in the region to capture the business opportunities. The merged RHB Investment Bank Group has successfully completed 3 notable business deals last year and expects greater business achievement in the near future. In view thereof, the Group should be able to manage and improve its CIR. On the other hand, the current net interest margin of RHB Bank Berhad is 2.35%.

Mr Quah Ban Aik, a corporate representative of MSWG, commented that RHB Banking Group has made commendable and sustainable growth over the past 3 years. MSWG also acknowledged the Group's continuing efforts to improve its corporate governance standards (especially the fixing of maximum service tenure of Independent Non-Executive Directors, enhancement of boardroom diversity, etc.) as well as to promote and enforce the principles and recommendations of Malaysian Code of Corporate Governance 2012.

There being no further questions from the Members, the Chairman then proceeded to the next Agenda.
