RHB SMALL CAP CORPORATE ACCESS NAVIGATE INVESTORS TOWARDS REGIONAL INVESTMENT OPPORTUNITIES

Kuala Lumpur – RHB Banking Group (“RHB” or “the Group”) recently held its third RHB Small Cap Corporate Access webinar to bridge the gap between investors and under-the-radar public listed companies, as well as navigate investors towards capitalizing on the strong growth potential of this market segment.

The full-day virtual event featured 16 small cap companies from across the region with market capitalization of USD4.9 billion. Various discussion and knowledge sharing sessions were conducted by industry experts and corporate representatives throughout the event, covering diverse industries including banking, technology, construction services, property development, human resources, oil & gas, and education.

The RHB Small Cap Corporate Access webinar benefited over 200 participants including institutional investors, fund managers, buy-side analysts from insurance, private asset management and unit trust companies, as well as representatives of Government-Linked Investment Companies (GLICs) and endowment funds, long-only funds, hedge funds and pension funds from Malaysia and South East Asia.

“Our RHB Small Cap Corporate Access series is a prime example of how we have been pushing ahead to help investors enhance and expand their investment opportunities within the small cap space. Over the years, we have been able to raise the visibility of small cap companies on Bursa Malaysia, as well as prepare these companies in anticipating the expectations of the investing community.

We have also witnessed improved investor engagement activities undertaken by the small cap companies. For instance, small cap companies from the renewable energy sector are able to better understand investors' concerns regarding the industry, whereas other small cap companies are able to present their qualities and prospects beyond what is formally reported.

We hope to continue to provide our investors with an 'investment edge' that steers them towards making informed decisions, and ultimately maximising returns by penetrating the USD196 billion small cap investment opportunities regionally," said Ganesh Sabaratnam, Chief Executive Officer/Managing Director of RHB Investment Bank Berhad.

The RHB Small Cap Corporate Access webinar is a lead up to the launch of the highly anticipated RHB Small Cap Top 20 Jewels 2023 Edition that annually lists stock investment ideas from RHB Investment Bank research teams in Malaysia, Indonesia, Singapore, and Thailand.
