Digital Option Structured Investment

BRIEF INFORMATION ON THE PRODUCT

1. What is this product about?

Digital Option Structured Investment ("Digital Option") is a principal-protected investment with an embedded reference derivative. The performance of the embedded derivative will determine the interest payable for the investment. At the inception of the investment, the Investor agrees to the underlying currency pair for the Digital Option and the 'Trigger Rate'. The Trigger Rate which is fixed upfront is the exchange rate for the currency pair which determines whether the Investor will receive a minimum or maximum interest on the Maturity Date. The terms of the particular Digital Option may provide for a Trigger Rate which is either higher than or lower than the Spot Rate on the Trade Date. If the Trigger Rate is fixed upfront as higher than the Spot Rate on the Trade Date, the Investor will receive the maximum interest rate if the Spot Rate at 2pm KL time on Expiry Date is higher than the Trigger Rate. Otherwise, the minimum interest rate will be paid to the Investor. If on the other hand, the Trigger Rate is fixed upfront as lower than the Spot Rate on the Trade Date, the Investor will receive the maximum interest rate if the Spot Rate at 2pm KL time on Expiry Date is lower than the Trigger Rate. Otherwise, the minimum interest rate will be paid to the Investor. In either case if the Spot Rate at 2pm KL time on the Expiry Date is equal to the Trigger Rate, the minimum interest rate will be paid to the Investor. Please take note that the minimum interest rate can be zero depending on the terms of the particular Digital Option.

The initial Investment Amount is protected only if the investment is held until maturity.

This structured investment is insured by Perbadanan Insurans Deposit Malaysia. Please refer to the Risk Disclosure Statement for further details on the amount insured.

PRODUCT SUITABILITY

2. Who is this product suitable for?

You must be a high net worth individual, high net worth corporation/entity or an accredited investor (each as defined in the Structured Investment Application Form) to invest in this investment.

This product may be suitable for investors:-

- who have a view on foreign exchange rate movements for the investment period
- with risk appetite and are looking for potentially higher returns on their investments
- who are willing to take the risk of earning the minimum interest rate which could even be zero, on the chance of earning the maximum interest rate
- who are able to hold the investment to maturity.

6. What are the possible outcomes of my investment?

Customer will receive either the maximum or the minimum interest from this investment. The following are illustrations of the possible outcomes from this investment :

Trade Date	25 March 2014	Start Date	27 March 2014
Expiry Date	29 December 2014	Maturity Date	31 December 2014
Currency Pair	USD/CNH	Investment Amount	USD 100,000
Minimum Interest Rate	2.00% p.a	Maximum Interest Rate	5.00% p.a
Trigger Rate for Scenario 1,2 & 3	6.02	Trigger Rate for Scenario 4 & 5	5.90
Spot Rate on Trade Date	5.95		

Scenario 1: (If the Trigger Rate is fixed upfront as higher than the Spot Rate on Trade Date at 6.02)

USD/CNH **trades lower than** the Trigger Rate of 6.02 at 2pm KL time on the Expiry Date (29 Dec 2014). Investor will receive the minimum interest rate of 2% p.a. plus the initial Investment Amount of USD 100,000 on the Maturity Date (31 Dec 2014):

$$\begin{aligned}
 & \text{Investment Amount} + (\text{Investment Amount} \times \text{Minimum Interest Rate} \times \text{Investment Tenor/Day Count Convention}) \\
 & = \text{USD } 100,000 + (\text{USD } 100,000 \times 2.00\% \times 279/360) \\
 & = \text{USD } 100,000 + \text{USD } 1550 \\
 & = \text{USD } 101,550
 \end{aligned}$$

Scenario 2: (If the Trigger Rate is fixed upfront as higher than the Spot Rate on Trade Date at 6.02)

USD/CNH **trades higher than** the Trigger Rate of 6.02 at 2pm KL time on the Expiry Date (29 Dec 2014). Investor will receive the maximum interest rate of 5% p.a. plus the initial Investment Amount of USD 100,000 on the Maturity Date (31 Dec 2014):

$$\begin{aligned}
 & \text{Investment Amount} + (\text{Investment Amount} \times \text{Maximum Interest Rate} \times \text{Investment Tenor/Day Count Convention}) \\
 & = \text{USD } 100,000 + (\text{USD } 100,000 \times 5.00\% \times 279/360) \\
 & = \text{USD } 100,000 + \text{USD } 3875 \\
 & = \text{USD } 103,875
 \end{aligned}$$

Scenario 3: On 1 July 2014, which is before the Maturity Date, Investor decides to cancel their investment. The actual amount to be returned to the Investor will be adjusted for any unwinding cost arising from the early termination. The Investor may receive an amount less than their initial Investment Amount:-

Unwinding Cost for premature termination/cancellation :	
Cancellation date	1 July 2014
Investment Amount	USD 100,000
Unwinding Cost	(USD 600)
Total Amount Redeemed (USD 100,000 – USD 600)	USD 99,400

Investor receive USD 99,400 which is less than the initial Investment Amount of USD 100,000 due to deduction of unwinding cost on premature withdrawal

Scenario 4: If the Trigger Rate is fixed upfront as lower than the Spot Rate on Trade Date at 5.90

USD/CNH **trades higher than** the Trigger rate of 5.90 at 2pm KL time on the Expiry Date (29 Dec 2014), for example USD/CNH trades at 5.92. Investor will receive the minimum interest rate of 2% p.a. plus the initial Investment Amount of USD 100,000 on the Maturity Date (31 December 2014):

$$\begin{aligned}
 & \text{Investment Amount} + (\text{Investment Amount} \times \text{Minimum Interest Rate} \times \text{Investment Tenor/Day Count Convention}) \\
 & = \text{USD } 100,000 + (\text{USD } 100,000 \times 2.00\% \times 279/360) \\
 & = \text{USD } 100,000 + \text{USD } 1550 \\
 & = \text{USD } 101,550
 \end{aligned}$$

WARNING

THE RETURNS ON YOUR STRUCTURED PRODUCT INVESTMENT WILL BE AFFECTED BY THE PERFORMANCE OF THE UNDERLYING ASSET / REFERENCE, AND THE RECOVERY OF YOUR PRINCIPAL INVESTMENT MAY BE JEOPARDISED IF YOU MAKE AN EARLY REDEMPTION.

Scenario 5: If the Trigger Rate is fixed upfront as lower than the Spot Rate on Trade Date at 5.90

USD/CNH **trades lower than** the Trigger rate of 5.90 at 2pm KL time on the Expiry Date (29 Dec 2014), for example USD/CNH trades at 5.87. Investor will receive the maximum interest rate of 5% p.a. plus the initial Investment Amount of USD 100,000 on the Maturity Date (31 December 2014):

Investment Amount + (Investment Amount x Maximum Interest Rate x Investment Tenor/Day Count Convention)

$$= \text{USD } 100,000 + (\text{USD } 100,000 \times 5.00\% \times 279/360)$$

$$= \text{USD } 100,000 + \text{USD } 3875$$

$$= \text{USD } 103,875$$

PLEASE TAKE NOTE: The above simulations are being provided for illustrative purposes only and are not a forecast or indication of any expectation or performance. It does not represent actual termination or unwind cost that may be available to you. It does not present all possible outcomes or describe all factors that may affect the value of the transaction.

FEES AND CHARGES

7. What are the fees and charges I have to pay?

None

KEY RISKS

8. What are the key risks associated with this product?

Investor will be exposed to the following risks:

- i) Depending on the performance of the currency pair exchange rate, you may receive the minimum interest rate which, depending on the terms of your investment, could be zero.
- ii) The opportunity to earn the maximum interest rate is dependent on the Spot Rate of the currency pair at a fixed time and date i.e. 2pm on the Expiry Date regardless of the Spot Rate during the Tenor of the Digital Option.
- iii) If you terminate your investment prior to maturity, you will be subject to unwinding cost which can be significant. The amount redeemed upon an early termination will be after deduction of these costs and will be less than the initial Investment Amount.
- iv) Price and Market Risk
- v) Liquidity and Market Disruption
- vi) Currency Risk
- vii) Credit and Legal Risk
- viii) Options Risk
- ix) Operational Risk

Please refer to the Risk Disclosure Statement for further details of the above key risks factors.

You are advised to read this Product Highlights Sheet for Digital Option Structured Investment together with the Master Term Sheet, General Terms & Conditions and Risk Disclosure Statement for the detailed terms and conditions applicable to and risks of investing in this product. You are advised to carefully consider all risk factors before making an investment decision. You may also be required to complete a Suitability Assessment in accordance with applicable guidelines

9. How often are valuations available?

Valuations on the **Digital Option Structured Investment** will not be available due to the short-dated nature of the product

10. How can I exit from this investment and what are the risks and cost involved?

A cooling-off period will apply during the Sales Period. After closure of the Sales Period, the investor is strongly discouraged from early terminating the investment. Early termination of the **Digital Option Structured Investment** will be subject to unwinding cost and investor may receive an amount less than the initial investment.

11. What do I need to do if there are changes to my contact details?

It is important that you inform us immediately of any change in your contact details to ensure that all correspondences reach
