BRIEF INFORMATION ON THE PRODUCT													
<p>1. What is this product about?</p> <p>Put Spread Structured Investment ("PSSI") is a principal-protected investment with embedded derivatives. The performance of the embedded derivatives will determine the interest payable for the investment. At the inception of the investment, the Investor agrees to the underlying currency pair, the Strike Rates and the Tenor. The Strike Rates are pre-determined exchange rates of the currency pair.</p> <p>PSSI has two Strike Rates, the Upper Strike Rate and Lower Strike Rate. If the Fixing Spot Rate (<i>the prevailing exchange rate of the currency pair at 2pm KL time</i>) is equal to or less than (\leq) the Lower Strike Rate, the Investor will receive the Maximum Interest Rate on maturity. If the Fixing Spot Rate of the currency pair is equal to or more than (\geq) the Upper Strike Rate, the Investor will receive the Minimum Interest Rate on maturity. The PSSI also provides the Investor with participation in the weakening of the chosen currency in the currency pair whereby if the Fixing Spot Rate of the currency pair is above ($>$) the Lower Strike Rate but below ($<$) the Upper Strike Rate, the Investor will receive interest at a rate which is more than the Minimum Interest Rate but less than the Maximum Interest Rate based on a fixed formula. Please see Section 6: for illustrations on how the PSSI works.</p> <p>The Interest payable for the PSSI will be determined based on the Fixing Spot Rate of the currency pair at 2pm KL time on the Expiry Date. Please take note that the Minimum Interest Rate could be zero based on the terms of the particular PSSI.</p> <p>This structured investment is insured by Perbadanan Insurans Deposit Malaysia. Please refer to the Risk Disclosure Statement for further details on the amount insured.</p>

Scenario 3: USD/MYR trades between the Lower Strike Rate and the Upper Strike Rate (3.1800 - 3.3100) at 2pm KL time on the Expiry Date (7 Oct 2014), for example USD/MYR trades at 3.2500. Investor will receive the Participating Interest Rate of 5.56% p.a. plus the initial Investment Amount of MYR 100,000 on the Maturity Date (9 Oct 2014):

$$\begin{aligned} \text{Enhanced Yield*} &= (\text{Upper Strike Rate} - \text{Fixing Spot Rate}) \times \text{Beta} \times \text{Day Count Convention/Tenor} \\ &= (3.3100 - 3.2500) \times 0.2500 \times 365/120 \\ &= 4.56\% \end{aligned}$$

$$\begin{aligned} \text{Participating Interest Rate} &= \text{Minimum Interest Rate} + \text{Enhanced Yield*} \\ &= 1\% + 4.56\% \\ &= 5.56\% \end{aligned}$$

$$\begin{aligned} &\text{Investment Amount} + (\text{Investment Amount} \times \text{Participating Interest Rate} \times \text{Tenor/Day Count Convention}) \\ &= \text{MYR } 100,000 + (\text{MYR } 100,000 \times 5.56\% \times 120/365) \\ &= \text{MYR } 100,000 + \text{MYR } 1827.95 \\ &= \text{MYR } \underline{\underline{101,827.95}} \end{aligned}$$

Scenario 4: On 25 July 2014, which is before the Maturity Date, the Investor decides to cancel their investment. The actual amount to be returned to the Investor will be adjusted for any unwinding cost arising from the early termination. The Investor may receive an amount less than their initial Investment Amount:

Cancellation Date	25 July 2014
Investment Amount	MYR 100,000
Unwinding Costs	(MYR 4000)
Total Amount Redeemed (MYR 100,000 – MYR 4000)	MYR 96,000

Investor receives MYR 96,000 which is less than the initial Investment Amount of MYR 100,000 due to the deduction of unwinding cost on premature withdrawal.
