MANAGER'S COMMENTS

MARKET REVIEW

For the month of January 2018, global equity did well despite 10-year US treasury yields climbing sharply from 2.4% to 2.7% in January 2018. Global equity markets started the year in 2018 rising 5.6% during the month. Rising 2018 EPS growth expectations and synchronized growth are driving a strong risk-on sentiment across the world. Meanwhile, Asia Ex-Japan equities (+7.5%) were primarily driven by the surge in Chinese equities (+12.5%) as Q4 GDP growth of 6.8% YoY as well as the trade surplus beat estimates. Semiconductor foundries, led by index heavyweight TSMC (+13.0%), propelled Taiwan (+7.6%) on anticipation of strong demand for high-end chips FROM cryptocurrency market players.

The FBMKLCI started the year strong up +3.99% on the back of heightened foreign interest in the market. Foreign investors were net buyers and bought RM3.4bn worth of shares in January 2018. Average market volume for the month surged to RM4b.5n shares/day vs last year's average daily of 2.5bn shares. BNM announced a 25bps OPR hike on January 25, 2018 and banking sector were viewed as the beneficiaries from rising interest rate. Meanwhile, the ringgit hit a new high since April 2016 at 3.8890 while the FBMKLCI reached a near 3-year high of 1870 points on 29TH January 2018. The local bourse rallied in tandem with regional markets which all ended on a strong positive note at month end.

The best performing sector for the period was the Finance Index. Biggest movers were CIMB (+10.86%), PBK (+5.77%) and HLBK (+9.41%). Most banking stocks continued the positive momentum from December 2017, on the back of foreign buying into banking stocks. The property sub-index was the worst performer for the period, declining -1.96%. The biggest laggards were SP Setia (-22.25%). On the other hand, the rate hike by BNM dampened sentiments on property stocks as investors turned cautious that the rate hike would further dampen the already weak property market. The property was also impacted late last year after government imposed a ban on the development of luxury properties in a move to control the oversupply of properties in the market.

MARKET OUTLOOK AND STRATEGY

The sharp increase in the 10-year US Treasury yield created fear among the investors on the pace and quantum of the US interest rate hike. The sharp rise in the 10-year US Treasury yield from 2.40 on 1st January 2018 to 2.86 as of 8th February 2018 signals higher than expected interest rate increase in the US. The higher than expected interest rate hikes would impact negatively on US corporate earnings and consumer spending going forward.

This has caused the sharp drop in the index in the beginning of Feb 18. However, we believe the drop in the index has brought the valuation level back to an attractive level for S&P 500 stocks. The index has come down to an attractive level now and is trading below November 2016 valuation level.

We are of the view that Malaysia's corporate earnings growth of 6% is achievable in 2018 due to strong economy. However, the negative sentiment in the US is also expected to drag the index lower. The index touched the low of 1792 level on 4 February 2018 which was also close to the mean valuation of KLCI. We believe the KLCI performance will be volatile in the short term. We would expect the index to be well supported above 1790 level. We would take the opportunity to accumulate strong fundamental blue chip stocks on market weakness. We believe the index would go back to 1,870 level once the US stock market's volatility starts to disappear as investors would have priced in higher interest rate expectations.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 January 2018, the Volatility Factor (VF) for this fund is 11.0 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to, was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 15 July 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are stock market risk, liquidity risk, individual stock risk and issuer risk. These risks and other general risks are elaborated in the Master Prospectus.
