MANAGER'S COMMENTS

MARKET REVIEW

Global equities witnessed a broad-based sell-off in February 2018, registering its weakest month in two years despite a partial recovery in the second half of the month. Rising inflation expectations and bond yields (10-year treasury yields up from 2.7% at the start of the month to 2.9%) wreaked havoc on global equities that had been experiencing lofty sentiments, as volatility sky-rocketed. The United States ("US") Federal Reserve Chairman Jerome Powell's optimistic views left market participants anticipating a faster pace of rate hikes in the US and debating the possibility of 4 rate hikes during 2018. Asia excluding Japan suffered bigger sell down led by China (-6.4%), India (-6.9%) and Korea (-6.6%). Association of Southeast Asian Nations ("ASEAN") (-1.5%), which underperformed in 2017, fared relatively better.

The FBM KLCI started the month on a weak footing as the index tracked the sell down in global markets earlier in the month on 5th February 2018 which saw the index dipped -2.2% on that day. After buying around RM3.37 billion net in January 2018, foreign investors turned net sellers in the first week of February 2018 with around RM1.98 billion worth of shares sold net. However, market recovered steadily, in line with the rebound in global indices. For the remainder of the month, market held steady trading range-bound ending the month in the red (-0.66%) in line with most regional markets. For the period, the best performing sector for the period was the Consumer Index (+2.4%). Nestle was the biggest mover, after it reported a good set of 4Q17 results despite the challenging environment. Its net profit double to a record high of MYR133.54 million, driven by supply chain efficiency, product portfolio and promotional activities. It also announced a higher dividend of MYR1.35 for the quarter bringing the total dividends for the year to MYR2.75. Worst performing sector was construction which declined by -5.93%. The biggest laggards were IJM (-11.97%) and Gamuda (-3.12%). IJM reported weaker results which missed estimates on the back of lower contribution from the property segment and the manufacturing division.

On the economic front, we saw our 4Q17 gross domestic product slowing down to 5.9% year-on-year but beating market consensus of a 5.7% year-on-year growth. January 2018's consumer price index rose to 2.7% year-on-year after a 3.5% rise in the prior month.

MARKET OUTLOOK AND STRATEGY

We are still positive on the Malaysia equity market outlook due to the following reasons; global growth will be sustained in 2018 supported by synchronized expansions in major economies like the US, Europe, Japan and China. Global monetary policies will still remain accommodative, despite un-synchronized monetary tightening plans in place. Gradual improvement in global growth and trades will benefit ASEAN economies through better exports, and eventually domestic demands. Malaysia healthy economic growth of 5.0%-5.5%, supported by resilient domestic demands & investments and external demand, will be supportive of the equity market in 2018.

Export growth in MYR terms jumped to 17.9% year-on-year in January 2018, on account of a broad based surge in shipment of Electrical & Electronics (E&E), non-E&E and commodity products. The strong trade numbers in January 2018 point to a sustained global demand.

Looking forward, we believe there is sustained momentum in external activity and we expect exports to grow at a healthy pace albeit slowing from 18.9% recorded in 2017. This is on account of a higher base in 2017, a slowdown in China's demand for the country's exports, but partly mitigated by the resilient external of E&E shipments and higher commodity prices. We continue to look for stocks with strong fundamentals and decent valuation to add into our portfolio.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 February 2018, the Volatility Factor (VF) for this fund is 11.3 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 August 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
