RHB DIVIDEND VALUED EQUITY FUND

This Fund aims to provide investors with total returns primarily through investment in equity and equity related securities of companies which offer attractive yields and sustainable dividend payments.

MANAGER'S COMMENTS

MARKET REVIEW

In February, MSCI AC Asia Index and MSCI AC South East Asia Index returned -3.0% and -1.0% respectively. The best performing indices were MSCI Thailand Index and MSCI Indonesia Index with returns of 2.5% and -2.7% respectively. MSCI China Index and MSCI Korea index were among the worst performing indices with returns of -5.9% and -5.8% respectively.

China's manufacturing PMI was slightly below expectations at 50.3 vs. consensus of 51.1. This is the third consecutive monthly decline and was mainly driven by fall in production and new orders. Taiwan's 4Q17 GDP was slightly below expectations at 3.28% YoY vs. 3.3% YoY. Malaysia's 4Q17 GDP grew at 5.9% YoY with private investment doubling and public consumption boosted from higher oil prices. Thailand 4Q17 GDP fell 4% YoY from 4.3% YoY in 3Q17 with weakness coming from the agricultural sector. Thailand reported lower inflation from raw food prices and inadvertently impacts farm income which will likely see a continued weak rural area consumption.

MARKET OUTLOOK AND STRATEGY

US real GDP grew 2.6% QoQ in the 4Q 2017 and missed expectations of 3.0%. The GDP miss was due to strength in goods imports and inventory accumulation. Core inflation surged higher in January at 1.8% YoY, higher than consensus expectations of 1.7% YoY. The pick-up in inflation was attributed to core good prices and used auto prices. President Trump signed a budget bill which ended an hours-long shutdown in the government.

The Fund is positioned into high quality Asia stocks in structurally strong markets/sectors and companies with improving earnings and/or dividend.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 February 2018, the Volatility Factor (VF) for this fund is 11.0 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 15 July 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are stock market risk, currency risk, liquidity risk, country risk, sector risk, interest rate risk, credit/default risk, issuer risk, inflation/purchasing power risk and regulatory risk. These risks and other general risks are elaborated in the Master Prospectus.

This factsheet is prepared for information purposes only.
