MANAGER'S COMMENTS

MARKET REVIEW

In February, MSCI AC Asia Index and MSCI AC South East Asia Index returned -3.0% and -1.0% respectively. The best performing indices were MSCI Thailand Index and MSCI Indonesia Index with returns of 2.5% and -2.7% respectively. MSCI China Index and MSCI Korea index were among the worst performing indices with returns of -5.9% and -5.8% respectively.

China's manufacturing PMI was slightly below expectations at 50.3 vs. consensus of 51.1. This is the third consecutive monthly decline and was mainly driven by fall in production and new orders. Taiwan's 4Q17 GDP was slightly below expectations at 3.28% YoY vs. 3.3% YoY. Malaysia's 4Q17 GDP grew at 5.9% YoY with private investment doubling and public consumption boosted from higher oil prices. Thailand 4Q17 GDP fell 4% YoY from 4.3% YoY in 3Q17 with weakness coming from the agricultural sector. Thailand reported lower inflation from raw food prices and inadvertently impacts farm income which will likely see a continued weak rural consumption.

MARKET OUTLOOK AND STRATEGY

US real GDP grew 2.6% QoQ in the 4Q 2017 and missed expectations of 3.0%. The GDP miss was due to strength in goods imports and inventory accumulation. Core inflation surged higher in January at 1.8% YoY, higher than consensus expectations of 1.7% YoY. The pick-up in inflation was attributed to core good prices and used auto prices. President Trump signed a budget bill which ended an hours-long shutdown in the government.

The Fund is defensively positioned with a balanced portfolio of Asia equities, REITs and bonds. The Asia bonds provide sustainable coupon yields and provides stability during uncertain times. In addition, the Fund is positioned into high quality Asia stocks in structurally strong markets/sectors and companies with improving earnings and/or dividend.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 February 2018, the Volatility Factor (VF) for this fund is 7.1 and is classified as "Moderate". (source: Lipper) "Moderate" includes funds with VF that are above 6.0 but not more than 8.0 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.
