### MANAGER’S COMMENTS

#### MARKET REVIEW

##### Equity

Global equities witnessed a broad-based selloff in February 2018, registering its weakest month in two years despite a partial recovery in the second half of the month. Rising inflation expectations and bond yields in the United States (“U.S.”) (10yr U.S. Treasury yields up from 2.7% at the start of the month to 2.9%) wreaked havoc on global equities that had been experiencing lofty sentiments, as volatility sky-rocketed. U.S. Federal Reserve Chair Jerome Powell’s optimistic views left market participants anticipating a faster pace of rate hikes in the US and debating the possibility of 4 rate hikes during 2018.

The benchmark FTSE Bursa Malaysia Kuala Lumpur Index (“FBMKLCI”) started the month on a weak footing as the benchmark index tracked the sell-down in global markets earlier in the month on 5th February 2018. The FBMKLCI dipped -2.2% on the day. However, market recovered steadily, in line with the rebound in global indices. For the remainder of the month, market held steady trading range-bound ending the month in the red, declining by -0.66% in line with most regional markets.

On the economic front, we saw our fourth quarter (“4Q”) 2017 Gross Domestic Product (“GDP”) slowing down to 5.9% year-on-year (“yoy”) but still beat market consensus of a 5.7% yoy growth. January 2018’s Consumer Price Index (“CPI”) rose 2.7% yoy after a 3.5% yoy rise in the prior month.

#### MARKET OUTLOOK AND STRATEGY

##### Equity

We are still positive on the Malaysia equity market outlook due to the following reasons i.e global growth will be sustained in 2018 supported by synchronized expansions in major economies like the United States, European Union, Japan and China. Global monetary policies will still remain accommodative, despite un-synchronized monetary tightening plans in place. Gradual improvement in global growth and trades will benefit The Association of Southeast Asian Nations (“ASEAN”) economies, through better exports, and eventually domestic demands.

Domestically, Malaysia’s economic growth is expected to be around 5.0%-5.5% supported by resilient domestic demands, investments and external demand. The positive economic backdrop will continue to be supportive of the equity market in 2018. In addition, strong domestic liquidity, stable Ringgit, undemanding valuation and an impending general election are also catalysts for the market to perform better.

In terms of strategy, We like Banking, Consumers, Building Materials, PNB transformation, Oil & Gas, Tourism, E-commerce, Construction, Building Materials, Industrial Manufacturing sectors.

#### DISCLAIMER:

Based on the fund’s portfolio returns as at 15 February 2018, the Volatility Factor (VF) for this fund is 17.2 and is classified as “Very High”. (source: Lipper) “Very High” includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund’s portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.
