**RHB USD HIGH YIELD BOND FUND - RM CLASS**

The Fund aims to maximise total return by investing in one target fund, i.e. the BlackRock Global Funds – US Dollar High Yield Bond Fund.

**MANAGER'S COMMENTS****PORTFOLIO ACTIVITY**

The Target Fund's risk profile increased in February and remains overweight relative to the benchmark; importantly, the team continues to favour more measured risk-taking overall and remains broadly constructive on high yield. Otherwise, there were no significant changes to the Target Fund's investment themes or positioning in February. From a sector standpoint, the Target Fund added risk to the lodging sector, while reducing risk in metals & mining and cable & satellite.

**MARKET OUTLOOK AND POSITIONING**

At month-end, the Target Fund maintained a large underweight to BB rated paper, an overweight to single-B rated credits and an overweight to select CCC rated issues with improving fundamental stories or other catalysts. Importantly, the Target Fund remains underweight the higher-yielding 9%-plus segment of the market, which contains a high concentration of significantly stressed assets. On the issuer front, the Target Fund's top overweights include Altice (cable & satellite), The Stars Group (gaming) and Cheniere Energy (independent energy). In addition to credit, the Target Fund Manager has favoured positions in equity and equity like (preferred and convertibles) instruments to enhance the Target Fund's total return profile; the Target Fund Manager will tactically implement hedges to mitigate this risk when markets warrant. Generally, the Target Fund remained well diversified, with 450+ issuers and an average issuer-level position of 17 basis points, with the top 25 names constituting ~32% of the Target Fund.
