## RHB BIG CAP CHINA ENTERPRISE FUND

This Fund aims to achieve long term capital appreciation through investments in securities of companies with high growth potential.

### MANAGER'S COMMENTS

#### MARKET REVIEW

Global equities ended mix in April. European equities advanced on weakened Euro and lack of tightening signals from European Central Bank. However, US Fed officials at their meeting signalled greater confidence in reaching their 2% inflation target over the coming years and affirmed plans to continue raising short-term interest rates gradually. Fed officials also believed the economy would grow faster than its sustainable rate, due to increasing fiscal spending and tax cuts. Such hawkish tone led to a spike in the long-dated US treasury yield and a rebound in USD, and resulting into a deeper correction in emerging market equities. In particular, US 10-year treasury yield hit the 3% threshold, the highest level since 2015, while MSCI Emerging Market Index fell over 1% throughout April.

China equities continued to fall in April, in tandem with their emerging market peers. What made the situation even worse was the intensified US-Sino trade tension, as Trump's administration banned a Chinese tech giant to secure semiconductor from the US. Another Chinese tech giant was also plausibly under investigation by the US Department of Justice. A series of bad news brought about an upheaval in the Chinese tech sector which resulted into a sell-off in hardware names. On the macro front, the weaker-than-expected Caixin manufacturing PMI, a leading gauge of the industrial activities among smaller firms, also soured investors' risk appetite.

#### MARKET OUTLOOK AND STRATEGY

We hold our long-term positive view over China equities, in view of strong manufacturing PMI data for April and very solid first-quarter corporate earnings. However, external factors including US-China trade dispute and climbing USD remain the two main overhangs for the stock market in the near term. The standoff between US and China, particularly Trump's tactics to defeat Chinese tech industry, would lay a bumpy road ahead for tech stocks. On the other hand, we maintain our positive view over old economy names. We prefer banking sector in view of the improvement in loan asset quality with still undemanding valuation. We have also upgraded basic material sector like steel and cement. Both sub-sectors will continue to benefit from supply side reforms, low inventory level and solid demand recovery from construction activities, while steel sector, particularly, will no longer be the battlefield of the US-China trade war. We also like consumer staples which are set to benefit from inflation and rising pricing power, and healthcare sector backed by the solid product pipelines and improved competitiveness. For the new economy sector, decent long-term growth potential remains intact, but the pace of monetisation from new business initiatives remains uncertain in the near term.

#### DISCLAIMER:

Based on the fund's portfolio returns as at 15 April 2018, the Volatility Factor (VF) for this fund is 18.0 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 September 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are restrictive geographical market, equities investment risks such as market risk and particular security risk and foreign investments risks such as country risk and currency risk. These risks and other general risks are elaborated in the Master Prospectus.
