MANAGER'S COMMENTS

MARKET REVIEW

Equity

Global equities were propelled by Developed Markets (+1.0%) to edge up 0.8% in April 2018, lifting YTD returns to -0.6%. Among the developed markets, US added 0.3%, Europe 2.2% and Japan 0.7%. Futures markets participants are anticipating three more rate hikes in 2018, driving 10-year Treasury yields to scale 3.0% for the first time since 2014. The consequent strengthening of the USD (+2.1%) caused further downside in Emerging Markets (EMs) Commodities performed strongly in April 2018 - energy prices sustained their rally from March 2018 (Brent Crude: +8.5%, Gasoline: +5.2%), industrial metals rose sharply (Aluminum: +12.5%, Copper: +1.4%).

Asia Ex Japan equities rose 0.6% in April 2018 after a roller coaster ride during the month. China and Hong Kong fell sharply in the first week on rising trade war concerns as China retaliated to the US tariffs on Chinese imports announced in March 2018, leading to consideration of additional tariffs by the US. However, markets recovered during the second half as tensions diffused with the continued opening up of the economy by China. A 100bp RRR cut by the PBoC provided comfort for investors. India (+4.1%) staged a mild recovery during the month after substantial underperformance in the first quarter, driven by the strong performance of software sector (+7.2%). Korea (+2.7%) was the cynosure in April 2018 with the historical Summit with North Korea paving the way for a peaceful, nuclear-free Korean Peninsula. Taiwan (-4.6%) was dragged down by the tech sector (-7.8%), which was suffering from the muted demand for iPhones as well as softer guidance from analysts for the next fiscal year.

The KLCI ended April 2018 with a 0.4% mom gain to close at 1,870 points and raised its cumulative gain to 4.1% in 4M18. This could be due to foreign net buy of RM1.5bn during the month. The KLCI also outperformed the MSCI Asia Pacific ex-Japan index (MXASJ) in April as well as the broader market and small cap sectors. The best performing sectors in April 2018 were REIT, construction and finance sectors. April 2018 was an eventful month for the Malaysian market. Malaysia's Prime Minister announced the dissolution of Parliament on 6 April 2018, paving the way for a general election (GE14) on 9 May 2018. Bursa Malaysia implemented the intraday short-selling framework for all investors on 16 April and the KLCI index posted a new record high of 1,895 points on 19 April 2018.

Malaysia registered forex reserves of USD107.8bn as at 30 Mar 2018, an increase from end-February's level and the highest level in three years. In MYR terms, forex reserves suffered a MoM loss of RM3.1bn to RM416.4bn. The MYR weakened in early April 2018, after rebounding in March, amid escalating trade tensions between the US and China.

Fixed Income

US Treasury ("UST") yields climbed from a low of 2.73% at the start of the month to touch 3.03% before closing at 2.96% for the month of April 2018 as market participants, absent of further geopolitical tensions escalating and a rosier outlook renewed the focus on the improving macro fundamentals of the US economy, where labor slack has improved and inflation is still on track.

On April 12, the Federal Open Market Committee ("FOMC") meeting minutes were released which reflected a hawkish tilt where a number of participants indicated a stronger outlook for economic activity and increased confidence that inflation would hit the 2% target over the medium term, reinforcing gradual pace of rate normalization over 2018 and 2019.

Ringgit Sovereign Bond

Malaysian Ringgit ("MYR") reversed all the gains made in March against the United States Dollar ("USD") despite oil rallying ~9% to reach new highs YTD in the month of April 2018. USDMYR climbed from 3.8635 at the start of the month breaking above 3.90 levels toward the end of the month to close at 3.9235, representing a -1.18% total return, MYR was the 9th best performing Asian currency closing just above Taiwanese Dollar and the Indian Rupee for April 2018. Local government bonds bear-steepened with the 15-year benchmark closing 24 basis points ("bps") higher month-over-month while 10-year Malaysia Government Securities ("MGS") closed the month at 4.13% (+19 bps higher). At month-end closed, MGS yields 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS were reported at 3.629% (March-2018: 3.447%), 3.764% (3.538%), 3.827% (3.969%), 4.129% (3.943%), 4.648% (4.412%), 4.730% (4.537%) and 4.880% (4.791%) respectively. The Government Investment Issues ("GII") - Shariah compliant version of MGS mirroring the same pattern with its MGS counterpart but the impact was not so much with 10-year GII benchmark closing 8 bps higher while the 15-year GII benchmark rose 11 bps higher. At closed, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year GII were reported at 3.602% (March-2018: 3.605%), 3.851% (3.878%), 4.063% (4.104%), 4.303% (4.222%), 4.699% (4.586%), 4.886% (4.767%) and 5.001% (4.897%) respectively.

Ringgit Corporate Bond

On the Ringgit corporate bond, April 2018 witnessed most of the trading activities concentrated in the first half of the month and the activity skewed towards longer end of the curve as market participants searching for higher yield in corporate space. The average daily volume seen progressing well above RM500 million mark compared to RM372 million in previous month of March. For this month, most activities concentrated in Government Guaranteed ("GG")/AAA space which printed about 50% of the transacted volume followed by AA space by 46% and single-A or lower by 4%.

Within Government Guaranteed ("GG")/AAA space, the long-dated Danainfra garnered some RM370 million transaction volume with the yield inched higher by an average of 6 basis points month-over-month. In AAA-rated space, volume was seen in long-tenor Danga 15-year bond which traded unchanged at 5.02% for the amount of RM205 million. Elsewhere in AA-rated space, Lebuhraya Duke Phase 3 with longer maturity of 2031 saw more than RM100 million transacted at higher yield month-over-month to close at 5.13%. Southern Power Generation ("SPG") papers were also actively traded during the month across the tenors with yield moved higher by 1 to 3 basis points for a cumulative amount of RM270m. For the A-rated universe, newly issued UMW Holdings Perpetual paper gained secondary interest with yield traded 20 bps lower post issuances with total amount of RM210 million.

During the month, some notable issuances were also seen tapping the market with Danainfra raised RM2.5 billion bonds to fund the Pan Borneo Highway project with tranches ranging from 7-year to 20-year with final pricing of 4.32% to 5.08% respectively. Another GG-rated issuance, MKD Kencana also tapping in RM1.3 billion to fund the Special Border Economic Zone in Kedah. The RM850 million 5-year tranche was priced at a final yield of 4.33% and the RM450 million 7-year tranche yielded 4.47%. Another notable issuance throughout the month was UMW Holdings Perpetual Non-Callable 10-years with issue size of RM1.1 billion with final yield of 6.35%.

MARKET OUTLOOK AND STRATEGY

Equity

The unpredictability of how the trade relationship between the US and China unfolds ahead is now a key risk to equity markets - now well conditioned to keep buying the dip. The potential risks will weigh on technology stocks, and escalation fears are likely to be a drag on the market. Investors remain complacent on inflation and monetary policies and, as the US Federal Reserve (US Fed) normalises and rates rise at a faster pace than what is currently priced in, we forecast a 25bps hike every quarter to end-2019.

Apart from GE14 results, investors will be tracking 1Q18 corporate earnings season and the 1Q18 GDP growth for Malaysia due out on 17 May 2018. We probably expect to see corporates to announce poor earnings due to margin squeeze arising from high commodity prices. In this regard, we are in no hurry to accumulate and would only buy on weaknesses.

Fixed Income

On the local Malaysian front, market dynamic has somewhat reversed after the respectable first quarter of 2018 with April seeing most of the activity concentrated in the first half of the month. As fears of trade wars diminished and geopolitical tensions quietened down, US yields started to go higher prompting MGS yields to follow suit, exacerbated by foreign investor fears of the upcoming Malaysian general election in early May.

10-year MGS sold off from 3.95% yield to above 4.2% through the month before settling at 4.12%, the price action mirroring the move higher on US 10-year. We were surprised somewhat by the quantum of the selloff as market seemed one sided and there was a lack of bids in the market, lack of liquidity likely due to the election risk and dealers lightening up position ahead of the perceived risk event. Going forward, we still foresee Malaysia's growth to remain on track for 5.4-5.5% GDP for 2018. With inflation assessment expected to average lower in 2018 we maintain the view that the current policy rate is still accommodative to the economy as MPC continue to assess the balance of risks in growth and inflation. In terms of strategy, we remain neutral on duration while mildly bullish in domestic bonds with the expectation that local demand dynamics to remain healthy and supply technical to remain supportive. As part of asset allocation strategy, we continue to overweight credit over government bonds for yield pick-up despite higher risk-free rates because we see improving credit profile in corporates in certain sectors and see the recent selloff as an opportunity to add positions on any undervaluation of bonds. With some allocation in MGS bonds for liquidity purposes on any sharp selloff and subject to the yields in developed markets stabilizing, so we can establish the new support levels.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 April 2018, the Volatility Factor (VF) for this fund is 12.1 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 15 July 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are allocation risks, stock market risk, interest rate risk, individual stock risk, credit / default risk, liquidity risk, issuer risk and inflation / purchasing power risk. These risks and other general risks are elaborated in the Master Prospectus.
