

RHB RETIREMENT SERIES - ISLAMIC EQUITY FUND

The Fund aims to provide above average capital growth over a medium to long-term[^] period by investing in one target Shariah-compliant fund.

[^] "medium to long-term" in this context refers to a period between 3 – 7 years.

MEMBER'S PROFILE

The Fund is suitable for Members who are looking for investments in a diversified portfolio of assets that comply with Shariah requirements. These Members are willing to accept moderate to high risk in their investments and prefer capital growth rather than income over a medium to long-term period.

INVESTMENT STRATEGY

- At least 95% of NAV: Investments in units of Dana Islam.
- 1% to 5% of NAV: Investments in liquid assets including Islamic money market instruments and placements of cash.

PROVIDER'S COMMENTS
MARKET REVIEW

Global equities (-0.2%) ended the month of May 2018 flat, dragging year-to-date (YTD) returns to -0.8%. Developed markets were mostly down with Europe falling 4.0% and Japan 1.1%, as investors responded with a risk-off stance to a host of factors that include the expectations of a growth slowdown outside the United States (US), the political uncertainty in Italy and Turkey, the renewal of sanctions on Iran and the currency crisis in Argentina. The rally in crude oil (Brent: +4.6%) continued in the first half of May 2018 but rolled over later on, as the reversal of prior supply cuts came back into consideration.

Asia Ex Japan equities lost 1.6% in May 2018, dragging YTD returns to -0.6%. China added 1.5% on the basis of the positive impact from the inclusion of A-shares in the MSCI benchmark indices. India (-3.7%) was adversely impacted by foreign outflows as overseas investors worried about the impact of higher oil prices as well as the results of the Karnataka state elections. Korea (-5.2%) had a tumultuous month, as the prospects of the North Korea-US Summit see-sawed. Malaysia (-8.3%) fell prey to foreign outflows on concerns of fiscal discipline following the historic victory of Tun Mahathir Mohamad in the general elections. Indonesia (-1.9%) conducted two rate hikes to arrest the slide in the Rupiah (-2.3% YTD), while the Philippines (-4.9%) hiked once.

The Kuala Lumpur Composite Index (KLCI) started the month relatively stable until the 14th General Elections (GE14) results on Wednesday, 9 May 2018 was announced. Against all odds and unforeseen by political analysts, the opposition, Pakatan Harapan won the Elections by a simple majority. Barisan Nasional, which was in power for 61 years, had lost winning only 79 seats vs Pakatan Harapan's 113. It was deemed as a black swan event and nervous investors anticipated a market sell-off. But, the two days holiday and the promise of reform and business-friendly speeches made by the new Prime Minister, Tun Dr Mahathir eased the jitters. The following Monday, the local bourse opened sharply lower, then it swung sharply higher before closing the day at positive territory. The market was relatively stable in the following days on the back of bargain hunting by local funds as foreign investors started exiting the market. Foreign funds have been net sellers every day since GE14. News flow was deemed not to be "market friendly" - which is to be expected. There were cancellations of many mega projects (East Coast Railway Link, High Speed Railway, Mass Rapid Transit 3), the revelation of Malaysia's total debt (on and off balance sheet) which stands at RM1trillion and of course the unravelling of 1Malaysia Development Berhad (1MDB). The "zero-rating" of Goods and Services Tax (GST) as well as the return of fuel subsidies had many expressing concerns on the risks to Malaysia's fiscal deficit reduction targets.

MARKET OUTLOOK AND STRATEGY

The dollar's recent strengthening against the euro has raised nervousness about emerging markets (EM). A stronger dollar and higher US yields would of course impose pain on EM asset prices, but we do not think EM is primed for any kind of major crisis. That view is reinforced by the fact that EM currencies are not especially expensive by historic standards. While we don't see huge financial vulnerability in EM, a strong dollar will push growth risks to the downside and inflation risks to the upside.

We opined that foreign investors will re-look at Malaysia given better transparency and corporate governance from the new government. Once the new government announce measures to plug in the revenue gap from the removal of GST and efforts to cut unnecessary spending, we believe that the market would stage a strong recovery. In the near term, we believe uncertainty over the state of the nation's fiscal position and external headwinds from the outflow of funds from emerging markets amid rising USD and trade tensions will lead to a choppy domestic equity market.
