

### RHB ENERGY FUND

The Fund aims to achieve long term capital appreciation through an investment that is linked to the global energy sector.

#### INVESTMENT STRATEGY

- 90% to 100% of NAV: Investments in Malaysian bonds, money market instruments, cash and deposits with financial institutions.
- Up to 10% of NAV: As capital payment for exposure to a derivative instrument in the form of a swap agreement that will provide the Fund with exposure to the global energy sector. With this capital payment, the Fund can have a notional amount of up to 100% of its NAV exposed to the Underlying which are linked to the global energy sector.

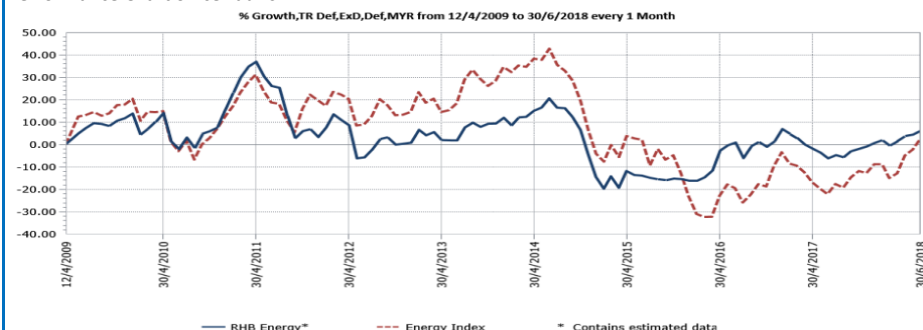

#### INVESTOR PROFILE

This Fund is suitable for investors who:

- seek investment opportunities in the global energy sector;
- seek capital growth;
- have a long term investment horizon; and
- have an appetite for risk to gain higher returns.

## RHB ENERGY FUND

The Fund aims to achieve long term capital appreciation through an investment that is linked to the global energy sector.

### MANAGER'S COMMENTS

#### MARKET REVIEW

The USD strength and tit-for-tat trade tariffs between US and China were important factors for the resource sector for the month of June. The scheduled meeting by OPEC on Friday 22-June was the main event for the month on Oil supply and the Conference noted that the oil market situation has further improved over the past six months, with the global economy remaining strong, oil demand relatively robust, albeit with some uncertainties, and with the market rebalancing evidently continuing.

Accordingly, the 4th OPEC and non-OPEC Ministerial Meeting decided that countries will strive to adhere to the overall conformity level, voluntarily adjusted to 100%, as of 1 July 2018 for the remaining duration of the Declaration of Cooperation (“DOC”) and for the Joint OPEC/Non-OPEC Ministerial Monitoring Committee (“JMMC”) to monitor the overall conformity level and report back to the OPEC and non-OPEC Ministerial Meeting. Oil rallied on the back of this agreement, which initially suggested a 600-800k increase in output which was lesser than market’s expectations, though the weekend saw an initial pledge of 1 million barrel-a-day increase in supply which should be shared proportionally among members, according to Saudi Arabia’s energy minister.

US President Donald Trump posted some mixed messages on oil over the weekend of 30th June as he initially stated that OPEC should stop its ‘manipulation’ of the oil market and increase production only to tweet later that the Saudi King has agreed to raise its production. The end result of this is expected to drive crude futures down though rising demand and supply disruptions are expected to support higher prices.

Brent Crude Oil price over the month increased by +3.45% month on month (“mom”) to USD 79.41/barrel as at the end of June, while on a 2018 year to date (“ytd”) basis, it has increased by +19.33%.

#### MARKET OUTLOOK AND STRATEGY

We continue to remain long-term positive in the resources sector as in previous months. The cycle is turning and industrial activities out of major economies continue to be solid. Near term dollar strength as well as US-China trade dispute are the major uncertainties however.

In the longer term, gradual improvement in the global economic growth will increase oil demand, and eventually will bring supply-demand back into balance, however we are cognizant that the oil sector is cyclical and the sudden spike higher in oil prices could lead to a correction on signs of lower demand and/or higher output from OPEC or elsewhere.

In terms of strategy, the Fund is still invested in local fixed income instruments for the resiliency of the domestic economy and staying sidelined on allocations in the energy swap while awaiting the decision from Vienna as it would create near term volatility. Despite the risks and volatility in the market, our medium to long term view holds that the continued gradual improvement in the fundamentals of the global economy will eventually lead to firmer oil prices.

#### DISCLAIMER:

Based on the fund’s portfolio returns as at 15 June 2018, the Volatility Factor (VF) for this fund is 10.2 and is classified as “Very High”. (source: Lipper) “Very High” includes funds with VF that are more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund’s portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2017 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2018.

A Product Highlights Sheet (“PHS”) highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Prospectus dated 3 September 2017 and its supplementary (ies) (if any) (“the Prospectus”) before investing. The Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Prospectus relates will only be made on receipt of a form of application referred to in the Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are credit and default risk, interest rate risk, counterparty credit risk associated with derivatives, derivative risk, legal/ regulatory risk, sector risk, currency risk, management risk, risk linked to the MSCI World Energy Index, returns are not guaranteed and risks relating to JPMCCI Energy Excess Return Index and the Contag Indices. These risks and other general risks are elaborated in the Prospectus.
