MANAGER'S COMMENTS

MARKET REVIEW

Investor sentiment rebounded from panic levels with the gradual dissipation of uncertainties around trade tariffs. The United States (US) (+3.5%) and Europe (+3.3%) led from the front by forging a trade deal, while Japan (+0.4%) stayed flat. This, coupled with strong economic growth in the US and Fed Governor Jerome Powell's testimony to the Congress, drove 10-year Treasury yields up by 10bp to 2.96%. As a result, Emerging Markets (EMs) (+1.7% in July, -6.1% YTD) breathed a sigh of relief, ending the month on a positive note for the first time since January 2018.

MSCI Asia Ex Japan equities edged up 0.3% in July 2018, with YTD returns at -5.5%, as underperformance by heavyweights China (-3.1%) and Korea (-1.5%) weighed on the otherwise modest gains of the region. Despite reversal to an expansionary policy stance, China continued to languish on the back of the Sino-US trade conflicts as well as from prior tightening. MSCI ASEAN (+4.0%) performed strongly as all countries posted positive returns.

FBM KLCI rose 5.3% mom in July 2018, mirroring the strong performance in ASEAN. OPR was unchanged, MYR was stable while 10-year MGS fell 4.1% mom to 4.07%. Telcos, oil and gas and industrials outperformed while consumer staples underperformed, led by defensive BAT and plantations due to ongoing trade war.

On the economic front, Bank Negara Malaysia (BNM) kept the Overnight Policy Rate (OPR) unchanged at 3.25% at its fourth monetary policy meeting this year. This is the first meeting chaired by new Governor Datuk Nor Shamsiah Mohd Yunus. The decision came widely expected. Inflation rate slowed sharply in June 2018 to +0.8% YoY (May 2018: +1.8% YoY) as the zero rating of GST resulted in slower increases or declines in prices of CPI basket of goods and services. S&P Global Ratings expects Malaysia to record strong consumption growth in 2018 driven by steady income growth amid a one-off boost in the second quarter following the phasing out of the goods and services tax (GST). For June 2018, data from the Statistics Department showed that the country's retail sales grew faster at 9.3% yoy, from 7.9% yoy May 2018, partly supported by the zero-rated GST.

The Penang government will consider requesting RM1bil soft loan from the federal government to expedite the Penang Transport Master Plan.

MARKET OUTLOOK AND STRATEGY

We continue to expect the OPR to stay unchanged at 3.25% for the rest of this year. The tone of the latest MPC statement was expectedly more dovish, and we think BNM is likely in a wait-and-see mode. Lower headline inflation gives BNM room to ease monetary policy if needed. But for now, a steady growth path supported by sustained domestic demand and net exports should keep the policy rate flat.

FBMKLCI likely to continue in consolidation mode as investors stay on the sidelines awaiting second quarter corporate results. We expect June export growth numbers to rebound boosted by MYR depreciation and a favourable base effect. We believe a similar base effect and a likely pick-up in private consumption after the zero-rating of the goods and services tax may have led to even stronger import growth, narrowing the trade surplus.

Investors will be closely tracking development regarding policy and leadership changes at the government-linked investment companies (GLICs). Investors will be also keeping close tabs on developments relating to the restructuring and takeover of Syarikat Pengeluaran Air Selangor Sdn Bhd (SPLASH), developments on the fate of the KL-Singapore High Speed Rail and East Coast Rail Link projects, as well as fulfillment of Pakatan Harapan's 10 promises in its manifesto as it approaches the 100 days anniversary on 18 August 2018.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 July 2018, the Volatility Factor (VF) for this fund is 16.9 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 11.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2018 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 August 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
