**RHB SINGAPORE INCOME FEEDER FUND - RM CLASS**

The Fund aims to achieve regular income and long term capital growth by investing in one target fund, i.e. RHB Singapore Income Fund.

**MANAGER'S COMMENTS****MARKET REVIEW**

Singapore's MAS expects to see GDP growth of 3% in 2018, and approximately 2.6-2.8% in 2019. Singapore's June non-oil domestic exports (NODX) contracted 8.2% m-o-m. The large decline was due to volatile pharmaceutical exports and reversal of strength the Target Fund witnessed from Tech in May. June core inflation was above consensus at 1.7% y-o-y with a broad based increase in inflation.

The government also implemented further tightening measures to the Singapore property market to curb excessive bidding of land prices. The new key measures include 1) additional 5% buyer's stamp duty for second residential properties for Singapore citizens and PRs 2) additional 5% BSD for foreigners buying any residential property 3) entities will see a 10% increase in ABSD to 25% with an additional 5% for developers (25% +5%). This measure is to address any overly aggressive land bids especially in the very buoyant en-bloc market 4) loan-to-value limit has been reduced 5% (80% to 75%) for all buyers. Previously tightening measure did not include the tightening of first time homebuyers.

MAS expects domestic sources of inflation to increase along with a pickup in domestic demand and faster wage growth. Also water tariff hikes, airport passenger levies and foreign domestic worker levy will support higher core inflation numbers. As expected MAS tightened the SGD stance in April and further tightening could be possible in October.

**MARKET OUTLOOK & STRATEGY**

Singapore stock market is a highly defensive market with blue-chip companies equipped with strong cash flow to pay high and sustainable dividends. The Target Fund is focused on income-producing equities that pay strong and sustainable dividend yields. These dividends represent a tangible return on investment and provides stability during uncertain times. At times, the Target Fund can also be more tilted towards growth depending on the market cycle. The Target Fund Manager favours companies with resilient business model that are backed by strong operating cash flows and robust balance sheet. Currently, the Target Fund Manager favours the reflationary trades such as banks given there is expected to be two more rate hikes this year, which could be supportive for the sector.

**DISCLAIMER:**

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Information Memorandum dated 18 January 2016 and its supplementary(ies) (if any) ("the Information Memorandum") before investing. The Information Memorandum has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Information Memorandum relates will only be made on receipt of a form of application referred to in the Information Memorandum. The Fund are only offered to "sophisticated investors" as defined in the Information Memorandum. For more details, please call 1-800-88-3175 for a copy of the PHS and the Information Memorandum or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are management risk, liquidity risk, currency risk and country risk and the specific risks of the Target Fund are market risk, country risk, equity risk, liquidity risk, interest rate risk, credit and default risk, exceptional market conditions, derivatives risk and realisation risk. These risks and other general risks are elaborated in the Information Memorandum.
