MANAGER'S COMMENTS

MARKET REVIEW

Asia ex-Japan equities underperformed the global benchmark for August. The region remained cautious with a stronger US dollar and an emerging market contagion as wildcards. Market sentiment on the region weighed down further after the US chose to proceed trade talks with Mexico while leaving issues with China hanging.

The healthcare sector registered the best performance amid escalating geopolitical issues and a waning demand in the technology sector. Other outperformers were telcos and consumer staple. Energy, consumer discretionary, industrial, IT and material performed in line with the market. All other sectors underperformed.

Economic data generally remained expansionary worldwide. The US purchasing managers' index (PMI) bounced back up to 61.3, the strongest in 14 years. Elsewhere, the China manufacturing gauge felt the pinch from the trade war. Though the official number in China inched up to 51.3, the Caixin fell to 50.6. For other major economies, the Eurozone and India PMIs declined.

Trade issues with the US continued to weigh uncertainty over the China markets as additional tariffs of US\$16 billion kicked before Beijing announced a retaliatory list. Within the mainland, declines in infrastructure fixed asset investments and renminbi depreciation dampened investor sentiment further. The worry extended to Hong Kong where technology companies saw downgrades and dragged down the index. Over in Taiwan, the technology sector came under pressure from unresolved tariff disputes and weak sentiment from Chinese companies.

For Korea, the mid-caps outperformed despite a large number of constituents reporting earning misses. The country saw foreign money inflows and the won gained against the USD. The Indian mid-caps outperformed, driven by a strong reporting.

Singapore and Indonesia markets struggled with the Philippines market outperformed while the rest of the ASEAN markets were in line with the regional benchmark. The city-state reported a weak set of export data and manufacturing sector activity, alongside creeping risks to growth for the third quarter. A poorer-than-expected GDP growth sees a lacklustre performance in Malaysia. Thailand only managed to be in line with the benchmark in spite of its lower currency risk and current account surplus amid emerging market fears. The Philippines had its outperformance supported by a hawkish central bank which hiked rates by 50 basis points to counter rising inflation. For Indonesia, a weakening bond and currency performance continued to weigh on the market.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 August 2018, the Volatility Factor (VF) for this fund is 11.1 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are more than 11.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2018 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 September 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risk of the Fund are management risk and foreign investment risks such as currency risk and country risk. The principal risks of the Target Fund are market risk, foreign exchange risk, political risk, derivatives risk, liquidity risk, small capitalization companies risk, single country, sector and regional risk, financial institution risk, equity risk, exceptional market condition risk, actions of institutional investors, broker risk and counterparty risk.
