**RHB CASH MANAGEMENT FUND 2**

The Fund aims to provide investors a high level of liquidity while providing reasonable returns by predominantly investing its assets in Malaysian Ringgit deposits with financial institutions in Malaysia.

**MANAGER'S COMMENTS**

**MARKET REVIEW**

Malaysian Ringgit ("MYR") continued to depreciate in August 2018 against the United States Dollar ("USD") despite Brent crude continuing to rally another 7% month on month. USDMYR climbed from 4.0652 at the start of the month and closed the end of the month above the 4.10 resistance at 4.1090, representing a -1.03% total return, and overall the 3rd worst performing Asian currency after Indian Rupee ("INR") and Indonesia Rupiah ("IDR"). Local government bond yields appear to be holding up well as levels continue to drift lower during the month. We believe onshore real money support has remained supportive in recent months, reflected by strong bid to cover ("BTC") trends from concluded government bond tenders since June 2018. Together with lower than anticipated 2nd Quarter GDP print, market has seen the short-end curve being consistently lifted as the "rate-cut" play is starting to take hold. However, we think the hurdle has increased for the curve to shift significantly lower in the absence of either large foreign inflows or an explicit dovish signal from the central bank. Overall, the curve has bull-flattened during the month with Malaysia Government Securities ("MGS") rallying across the tenor with the 20-year MGS the outperformer, closing the month 9 basis points ("bps") lower. At month-end closed, MGS yields 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS were reported at 3.48% (July-2018: 3.55%), 3.70% (3.75%), 3.94% (3.96%), 4.04% (4.07%), 4.47% (4.53%), 4.68% (4.77%) and 4.90% (4.91%) respectively. The Government Investment Issues ("GII") – Shariah compliant version of MGS mirrored the same pattern with its MGS counterpart on average about 5-10bps rally across the tenor as domestic liquidity improved during the month. At month end close, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year GII were reported at 3.51% (July-2018: 3.55%), 3.82% (3.86%), 4.00% (4.05%), 4.14% (4.19%), 4.53% (4.61%), 4.75% (4.85%) and 4.92% (4.94%) respectively.

On the local economic front, despite a lower than expected 2Q18 GDP reading of 4.5%YoY, Bank Negara Malaysia ("BNM") takes comfort from strength in underlying demand; inflation concern lingers, suggesting hurdle for rate cut remains high. BNM views the MYR depreciation as "in line or slightly better" vs. other regional currencies with BNM's role to limit FX volatility and ensure sufficient liquidity, rather than target specific levels of the USD-MYR. Near-term fiscal concerns allayed, but questions remain over growth impact and medium-term fiscal trajectory. Recent developments have led to a higher likelihood that the 2018 deficit target of 2.8% of GDP is achievable. Trigger for future rating actions more structural in nature and await Nov 2 budget. PH government retains broad public support for now on the reform agenda, but concerns over the economy, cost of living and interethnic issues remain. Malaysia's CPI for July 2018 printed at 0.9% YoY vs 0.8% YoY previous month, in line with estimates and mainly due to the pass through of the 6% Goods and Services Tax ("GST") abolition. June 2018 Industrial Production printed at 1.10%, far below estimates of 3.3%, and lower than last month's 3.0% reading, while June Trade Surplus registered lower than expectations at MYR 6.05bio, again slowing from last month's MYR 8.12bio surplus, attributed to a higher Import growth to +14.9%YoY vs last month +0.1%YoY, while Exports grew to 7.6% YoY from 3.4% YoY in May.

**DISCLAIMER:**

Based on the fund's portfolio returns as at 15 August 2018, the Volatility Factor (VF) for this fund is 0.1 and is classified as "Very Low". (source: Lipper) "Very Low" includes funds with VF that are above 0.0 but not more than 1.9 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2018 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 August 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are credit/default risk, inflation/purchasing power risk and interest rate risk. These risks and other general risks are elaborated in the Master Prospectus.
