RHB KLCI TRACKER FUND

This Fund aims to provide investment results that closely correspond to the performance of the Kuala Lumpur Composite Index (KLCI) or such other index as may be substituted by BMSB.

MANAGER'S COMMENTS

MARKET REVIEW

Global equity market tumbled in the month of October 2018 with Dow Jones declined more than almost 9% during the month. This has completely erased the gain for the year and Dow Jones is now trading at level below 1 January 2018. The meltdown continued towards the end of the month as United States (US) talks about extending tariffs to all Chinese imports. Nasdaq also briefly broke below 7000 level on news that United Kingdom (UK) might introduce much expected new tax on technology companies.

Asia was not spared from the meltdown with Taiwan and Korea being the worst hit countries with major indices down approximately 13% to 14%. Technology sector globally suffered the most as Amazon and Google miss earnings. Also, there were reports that China hacked into US companies by implanting a chip on servers destined for the US.

FBM KLCI declined by 4.7% to close at 1709 points, which are the least affected among the region. Telecommunication and technology sector were the worst performing sector. Foreigners also concern over rumors of introduction of capital gain tax. "A New Dawn" investor conference was held on 9 October 2018 with major speakers like Tun Dr. Mahathir bin Mohamad and Finance Minister Lim Guan Eng addressing investors' concerns. Malaysia is returning back into a position of prudence and is in restructuring mode to fix weaknesses and pare back debt. Slightly reduced GDP growth while improving the daily life outcome of Malaysia's bottom 40%/middle class population is an acceptable balance. Pakatan Harapan government aims to scale back equity stake in GLCs (to help with Budget 2019) and over time reduce "crowding out" of private businesses. Greater equity participation will be encouraged and a higher free-float eventually will help improve liquidity and cost of funding.

On the corporate front, MYEG and Datasomic share price was battered on worries about the fallout from the charges against former deputy prime minister Datuk Seri Ahmad Zahid Hamidi. On 19 October 2018, MYEG share prices hit limit down and trading was suspended in the afternoon session. MYEG released a press statement to Bursa Malaysia last Friday that its company was not implicated in the charges against Datuk Seri Ahmad Zahid Hamidi. The Malaysian government has rescinded its earlier decision to terminate MMC-Gamuda Joint Venture's contract for the Klang Valley MRT Line 2 (MRT2) underground works. The contract value will be reduced by RM3.6bn to RM11.9bn. The Energy, Green Technology, Science and Climate Change Minister Yeo Bee Yin announced that four proposed IPP contracts have been cancelled. These are (a) TNB and Malakoff's 700MW gas plant in Kapar; (b) TNB and Aman Majestic Sdn Bhd's 1,400MW plant in Paka; (c) Sabah Development Energy (Sandakan) Sdn Bhd and SM Hydro Energy Sdn Bhd's 300MW gas plant in Sandakan; and (d) Edra Power Holdings Bhd's 400MW solar plant.

MARKET OUTLOOK AND STRATEGY

Malaysia's economy is showing resilience and continues to perform however at moderating pace. Fiscal consolidation may see transitory impact on growth. Hence, going forward, government policy priorities will balance the objectives of fiscal consolidation and ensuring more inclusive economic growth. In this regard, we foresee a short-term impact on economic growth pursuant to the implementation of the fiscal reforms. However, structural policy measures as well as high impact development programmes and projects will continue to be implemented, albeit in a more transparent and financially sustainable manner. The growth outlook until 2020 can be deemed as cautiously optimistic.

Overall, we retain our view that the stock market could be volatile in the months ahead due to short-term domestic policy uncertainty and external risk factors. However, we are positive on the government's push to reform the country in the medium-to-long term. Budget announced seen the government's effort in trying to manage the market expectation and the budget deficit. As the priority is to reduce the nation debt, gaming taxes was increased substantial to cushion the national revenue loss due to GST.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 October 2018, the Volatility Factor (VF) for this fund is 8.6 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 8.7 but not more than 11.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2018 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2018.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 August 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks for the Fund are market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
