**RHB CASH MANAGEMENT FUND 1**

This Fund aims to provide liquidity and regular income for investors through investments primarily in the money market.

**MANAGER'S COMMENTS**

**MARKET REVIEW**

Malaysian Ringgit (“MYR”) continued to depreciate against the United States Dollar (“USD”) in November 2018, the 7th consecutive month since April 2018. USDMYR climbed from 4.1778 at the start of the month and closed the end of the month above the 4.1842 but reached a high of 4.2010 briefly before USD weakened, representing a -0.15% total return the only Asian country ex Japan that posted negative returns aside from Chinese Yuan (“CNY”). On the local rates, Malaysia Government Securities (“MGS”) has been largely quiet during the month as investors stayed sideline despite risk-off sentiments surrounding the external front. Nevertheless, the yield has inched higher towards the first two auction post Budget 2019 due to some concerns on the bigger auction size of MYR5.5 billion (MGII 7-year) and MYR4.5 billion (MGS 3-year). Towards the end of the month, market sentiments improved led by the index rebalancing activities on the back of inclusion 10-year MGII in the global bond index. The flows has given support to the longer-end of the sovereign curve as levels continue to be supported during the month and remain resilient, anchored by strong domestic support. We believe onshore real money accounts have remained supportive in recent months, reflected by strong bid to cover (“BTC”) trends from concluded government bond tenders despite higher supply absorbed by the private placement. Overall, the curve has bear-flattened during the month with long-tenor MGS adjusted lower on slower growth outlook and modest inflation expectation. At month-end closed, MGS yields 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS were reported at 3.69% (Oct-2018: 3.66%), 3.86% (3.79%), 4.04% (4.01%), 4.13% (4.09%), 4.54% (4.60%), 4.75% (4.78%) and 4.92% (4.95%) respectively. The Government Investment Issues (“GII”) – Shariah compliant version of MGS mirrored the same pattern with its MGS counterpart as the short-tenor yield ended higher while the backend of the curve flattened. At month end close, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year GII were reported at 3.78% (Oct-2018: 3.74%), 3.93% (3.91%), 4.15% (4.11%), 4.22% (4.25%), 4.59% (4.59%), 4.78% (4.78%) and 4.94% (4.94%) respectively.

On the local economic front, Malaysia’s Consumer Prices Index (“CPI”) for October 2018 recorded an increase of 0.6% which is in line with consensus and higher than 0.3% announced in prior month. According to Department of Statistics of Malaysia, the increase in the overall index was due to higher price for housing, water, electricity, gas and other fuels (+2.1%), restaurant and hotels (+1.2%), food and non-alcoholic beverages (+1.2%), education (+1.1%) and transport (+0.8%). It was likely reflecting the continued drawdown of older inventories built up during the tax holiday period. In the other headlines, Malaysia’s 3rd Quarter Gross Domestic Product (“GDP”) surprisingly slowed to 4.4% year-over-year compared to the consensus expectation of 4.6% and the second quarter number of 4.5%. The slower 3Q18 data was amid drag from net exports and inventory destocking even though domestic demand was better due to the tax holiday period. Underlying details showed that added gains from manufacturing, construction and services sector (combined of 5.3% points to headline growth) were offset by supply shocks and lower import duties.

**DISCLAIMER:**

Based on the fund’s portfolio returns as at 15 November 2018, the Volatility Factor (VF) for this fund is 0.1 and is classified as “Very Low”. (source: Lipper) “Very Low” includes funds with VF that are above 0.0 but not more than 1.9 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund’s portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2018 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2018.

A Product Highlights Sheet (“PHS”) highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 15 July 2017 and its supplementary(ies) (if any) (“the Master Prospectus”) before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are interest rate risk and inflation risk. These risks and other general risks are elaborated in the Master Prospectus.
