

### RHB RETIREMENT SERIES - ISLAMIC EQUITY FUND

The Fund aims to provide above average capital growth over a medium to long-term<sup>^</sup> period by investing in one target Shariah-compliant fund.

<sup>^</sup> "medium to long-term" in this context refers to a period between 3 – 7 years.

#### MEMBER'S PROFILE

The Fund is suitable for Members who are looking for investments in a diversified portfolio of assets that comply with Shariah requirements. These Members are willing to accept moderate to high risk in their investments and prefer capital growth rather than income over a medium to long-term period.

#### INVESTMENT STRATEGY

- At least 95% of NAV: Investments in units of RHB Dana Islam.
- 1% to 5% of NAV: Investments in liquid assets including Islamic money market instruments and placements of cash.

**RHB RETIREMENT SERIES - ISLAMIC EQUITY FUND**

The Fund aims to provide above average capital growth over a medium to long-term<sup>^</sup> period by investing in one target Shariah-compliant fund.

<sup>^</sup> "medium to long-term" in this context refers to a period between 3 – 7 years.

**PROVIDER'S COMMENTS****MARKET REVIEW**

Global equity markets rose 3.3% in the last week of November 2018 to advance 1.3% during the month, thereby curtailing year-to-date (YTD) losses to 4.3%, as Federal Reserve Chairman Jerome Powell hinted at the possibility of approaching the end to the hiking cycle. Asia ex-Japan equities rose 5.2% in November 2018, reducing YTD losses to -13.9%. The promise of an accommodative stance from the government, especially towards the private sector, at the end of October 2018 and optimism around a temporary truce in the United States-China trade war provided impetus to China (7.3%) and Hong Kong (7.0%) equities. Korea (+3.4%) underperformed relatively, given a weak 3Q earnings season and a gloomy earnings outlook for the technology sector in the region. Weak guidance from Apple led to the downward revision on technology countries like Korea and Taiwan.

FTSE Bursa Malaysia KLCI Index (KLCI) posted its third consecutive monthly decline of 1.7% month-on-month (MoM) in November 2018. The KLCI fell 29.4 points to close at 1,679 points at end November 2018. As a result, KLCI's YTD losses widened to 6.5%. Meanwhile, FTSE Bursa Malaysia Shariah Index fell 1.18%. We believe the decline could be due to foreign selling, weaker than expected results from earnings season, and losses in the Genting group's share prices. The latter was due to higher gaming taxes announced in Budget 2019 as well as news that the group has filed a United States (US) \$1 billion legal suit against Walt Disney Co and Twenty First Century Fox Inc over the cancellation of the first Fox branded theme park. Foreigners were again net sellers in November 2018 with a net outflow of RM0.7 billion.

Malaysia real Gross Domestic Product (GDP) growth softens to 4.4% year-on-year (YoY) in 3Q18 (from 4.5% in 2Q18), which is a tad lower than Bloomberg market consensus of 4.6%. A mildly expansionary 2019 budget with allocations for tax refunds and supportive measures has also provided more policy clarity. Key contributors to growth in 3Q18 were domestic demand particularly private sector spending while net exports turned bumpy. Key sectors that recorded expansion were services, manufacturing, and construction, while agriculture and mining & quarrying contracted further.

The current account surplus narrowed slightly to RM3.8 billion or 1.0% of GDP in 3Q18 (from RM3.9 billion or 1.1% in 2Q18), bringing YTD current account surplus to RM22.7 billion or 2.1% of GDP. The narrower surplus in 3Q18 was mainly due a wider deficit in the income account, which was offset by a higher goods trade surplus and narrower services deficit. Malaysia's modest growth is in line with a trend of slowing growth in the region. Emerging Market (EM) growth has been waning since March this year, affected by rising global interest rates, trade tensions, and idiosyncratic stress events in Argentina and Turkey. The main concerns going into 2019 remain the ongoing US-China trade dispute and the quantum of Federal Reserve rate.

**MARKET OUTLOOK AND STRATEGY**

The recent sell off in risk assets primarily reflects fears of weaker growth and a slowdown in corporate earnings in 2019. Sentiment on EM appears to be fairly cautious. Many expect a further escalation in trade tensions and assume EM will struggle in that environment. Trade war between major economies namely United States of America, China, European Union (EU), Canada and Mexico remain in global trade radar as downside risks.

What no one has been able to predict is how far the Trump Administration is prepared to put global growth at risk. At this moment, markets have resisted from pricing in a worst case scenario simply because rational investors argue that a full-blown trade war would be a counter-productive exercise that would stunt global trade and economic growth.

In Malaysia, business confidence for the next 3 to 6 months is expected to stay low amid policy changes and reforms made by the Pakatan Harapan government. The review of mega infrastructure projects such as East Coast Rail Link (ECRL), High Speed Rail (HSR) and Mass Rapid Transit Line 3 (MRT3) will have significant impacts on overall business confidence and investment flows. The new government promise to respect the rule of law, eliminate corruption and cronyism, and promote transparency and principles of good governance bodes well for the country's future in all respects.

**DISCLAIMER:**

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Disclosure Document in relation to the RHB Retirement Series dated 2 December 2015 and its supplementary(ies)(if any) ("Disclosure Document"), before investing.
