## RHB GOLDEN DRAGON FUND

This Fund aims to maximise total returns through a combination of long term growth of capital and current income.

### MANAGER'S COMMENTS

#### MARKET REVIEW

In the month of January, both the Hang Seng Index and Shanghai Stock Exchange Composite Index declined after the strong rally, recording -1.0% and -2.4% respectively. Both indices declined on the outbreak of the coronavirus (2019-nCov) despite the positive development over the trade war front where the US and China signed the "Phase I" agreement on 15th January 2020. The Coronavirus outbreak was first discovered on 8 December 2019 and notified by World Health Organization on 31 December. While the virus should negatively impact China's growth, Chinese authorities are willing to provide additional stimulus if necessary. So far, the Peoples Bank of China (PBOC) is pledging to inject liquidity into the system via reserve repo while lower policy rates by 10bps. As the Chinese economy is now much larger when compared to 2003 during the Severe Acute Respiratory Syndrome (SARS) epidemic (Nominal Gross Domestic Product (GDP) of about USD14 trillion vs USD1.5 trillion in 2003) and more connected to the rest of the world, the impact on global growth would be significantly higher this time. Investors should continue to pay attention to the number of new cases of the virus. An increasing number of studies are pointing to a reproduction number (R0) of around 2.5 – which could indicate a peak in the number of cases potentially within two weeks if the situation is contained. In Hong Kong, the consumer sectors were negatively impacted as a result of the outbreak, alongside real estate and healthcare sectors. Tourism-related exposures were not spared as well. While the social unrest has cooled down slightly, the epidemic outbreak continues to drag the economy.

On the macro front, China's January NBS manufacturing PMI came in at 50.0, showing only a moderate decline down 0.2pt from December's print. China's 4Q GDP reported came in in line with expectations with headline GDP growing 6.0% yoy, resulting in a GDP growth of 6.1% yoy for the year 2019, slowing from 6.6% yoy in 2018. Meanwhile, monthly data suggest solid momentum on the industrial production front growing 0.6% mom in December, but industrial profit fell 6.3% yoy. Retail sales growth stayed flat at 8.0% yoy in December. In Hong Kong, retail sales contracted 21% yoy in December despite the social unrest showing signs of cooldown after November. However, it is likely that the recovery momentum will continue to deteriorate quickly going forward as Hong Kong remains impacted by the coronavirus outbreak, as well as reduction in tourism flows.

#### MARKET OUTLOOK AND STRATEGY

In view of the current uncertainties surrounding the Coronavirus, the portfolios have adopted a defensive stance with increased cash levels. The portfolio have already reduced travel related, cyclical sectors, China offline retail and China property. We will continue to be positive on sectors including healthcare, E-commerce, domestic express delivery, online gaming sectors, as well as resilience in the technology space. With the higher cash levels, we will continue to be nimble to try to take advantage of stocks and sectors that will inevitably be over sold as the situation possibly worsens over the course of the next few weeks.

#### DISCLAIMER:

Based on the fund's portfolio returns as at 10 January 2020, the Volatility Factor (VF) for this fund is 7.9 and is classified as "Moderate". (source: Lipper) "Moderate" includes funds with VF that are above 6.1 but not more than 8.8 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2019 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2020.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 3 September 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are restrictive geographical market, interest rate risk, credit and default risk, foreign investment risks such as country risk and currency risk and equities investment risks such as market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
