MANAGER'S COMMENTS
PORTFOLIO STRATEGY

The Target Fund returned positively in February despite wider credit spreads. On a relatively basis, the Target Fund benefited from its overweight duration exposure. Of note, the Target Fund's overweight in the 5-7 years part of the curve added value. The Target Fund's underweight in Malaysia sovereign and quasi sovereign lifted relative returns. Underweight in Philippines and Indonesia sovereign bonds also contributed. Conversely, the Target Fund's selection in the Indonesia quasi sovereign, China property as well as China financial sectors detracted from relative returns. In terms of overall portfolio allocation, the Target Fund Manager continues to overweight the Chinese property sector, although more on an individual bond selection basis. The Target Fund Manager expects to see greater divergence in credit quality within the sector against the backdrop of weaker economic growth and slower property sales growth in the country. The Target Fund Manager is also overweight the China financial sector, favouring mostly investment grade asset management companies. At the same time, we have also retained our overweight in the Indonesia corporate sector. Within this market, the Target Fund Manager continues to favour selected names in the utilities sector as their yields are attractive and fundamentals remain sound. On the other hand, the Target Fund Manager remains underweight markets, such as Korea, Hong Kong and Philippines, where the Target Fund Manager finds valuations unattractive. The Target Fund Manager is also underweight sovereign and quasi sovereign bonds. The Target Fund Manager is currently overweight duration and will continue to actively manage the Target Fund's duration exposure in the current volatile market environment.
