MANAGER'S COMMENTS

MARKET REVIEW

Singapore has downgraded its 2020 GDP forecast to -4% to -1% from (-0.5% to 1.5%). There could be a possibility that a recession will extend till the third quarter. The government announced a supplementary budget allocating S\$28bn of support, bringing total budget to S\$48bn about 9.7% GDP. MAS has also eased the S\$NEER, re-entering and cutting the S\$NEER slope to neutral. The government is trying to provide cash flow support for companies via access to loans and cost cuts, enhanced property tax cuts and increased wage subsidies to protect jobs.

MARKET OUTLOOK & STRATEGY

Singapore stock market is a highly defensive market with strong blue-chip companies that is equipped with strong cash flow to pay high and sustainable dividends. The Target Fund is focused on income-producing equities that pay strong and sustainable dividend yields. These dividends represent a tangible return on investment and provides stability during uncertain times. At times, the fund can also be more tilted towards growth depending on the market cycle. Currently, the Target Fund Manager favours the reflationary trades such as banks given that it is a play on the macro recovery environment.
