MANAGER'S COMMENTS
PORTFOLIO STRATEGY

The Target Fund returned negatively for March amid the volatility in the market. The Target Fund's underweight positions in the India oil & gas and high yield commodity sector contributed as these names were sold down given the clouded demand outlook for oil and commodities with global growth expected to slow. An underweight in Philippine sovereign bonds also proved rewarding amid broad-based emerging outflows. Conversely, the Target Fund's overweight stance in Sri Lanka sovereign bonds detracted from relative returns. Overweight positions in the India corporates and Indonesia quasi sovereign bonds also took a toll on relative performance as these markets came under selling pressure amid the risk-off sentiment in March. In terms of overall portfolio allocation, the Target Fund Manager continues to overweight the Chinese property sector, although more on an individual bond selection basis. The Target Fund Manager expects to see greater divergence in credit quality within the sector against the backdrop of weaker economic growth and slower property sales growth in the country. The Target Fund Manager is also overweight the China financial sector, favouring mostly investment grade asset management companies. At the same time, the Target Fund Manager has also retained their overweight in the India and Indonesia corporate sectors. Within this market, the Target Fund Manager continues to favour selected names in the utilities sector as their yields are attractive and fundamentals remain sound. On the other hand, the Target Fund Manager remains underweight markets, such as Korea, Hong Kong and Philippines, where the Target Fund Manager finds valuations unattractive. The Target Fund Manager is also underweight sovereign and quasi sovereign bonds. The Target Fund Manager is currently overweight duration and will continue to actively manage the Target Fund's duration exposure in the current volatile market environment.
