MANAGER'S COMMENTS

MARKET REVIEW

Asia ex-Japan rose 8.9% in April 2020 (YTD: -11.4%), with China (6.3%) and Korea (8.2%) providing a glimpse into the possible future recovery for the world as they attempt to make their way back to normalcy. The supply side in China is mostly back to capacity, while market demand is also showing signs of recovery to its year-ago levels.

FBM KLCI saw its first MoM gain this year in April 2020 at +4.2%. YTD however, the index is still down 11.4%. Average trading volumes in April 2020 reduced to RM2.58 billion versus the RM2.94 billion in March 2020 though still above the 1Q average of RM2.52 billion. FBM KLCI ended the month at 1,407 points after falling to the lowest of 1,219 points on 19 March 2020.

As of 30 April, Malaysia reported a total of 6,002 of Covid-19 cases, out of which 4,171 has been recovered and discharged while 1,729 cases were still active. A total of 102 deaths has been reported so far. Given that the number of new cases has been declining and strong recovery rate, Prime Minister announced the reopening of most of the economy sectors on 1 May 2020.

MARKET OUTLOOK AND STRATEGY

The trade deal between US and China resurface again recently. Tensions have re-ignited as the former seeks to make the COVID-19 blame game a key focus for the elections as growth and low unemployment have imploded.

Malaysia has outperformed the MSCI ASEAN on a YTD basis. Although we believe that the market could do better as infection rate peaks, we believe that the market could still trend downwards from here towards the year end. We are expecting earnings growth to be negative this year as the companies suffer from COVID-19 disruption. We see value stocks and cyclicals having an opportunity to outperform now, but longer term we're still positive on quality & sustainable growth and themes.

DISCLAIMER:

Based on the fund's portfolio returns as at 10 April 2020, the Volatility Factor (VF) for this fund is 9.8 and is classified as "Moderate". (source: Lipper) "Moderate" includes funds with VF that are above 6.1 but not more than 8.8 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2019 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2020.
