MANAGER'S COMMENTS

MARKET REVIEW

Flattening of the COVID-19 new cases curves in the worst affected countries and aggressive stimulus package around the world pushed global equity market to their best monthly performance since 2011 in April 2020. Despite weak economic data prints, global equities snapped back +10.6% during the month (year to date ("YTD"): -13.5%), as volatility receded on partial reopening of numerous economies reeling under lockdowns. The supply side in China is mostly back to capacity, while market demand is also showing signs of recovery to its year-ago levels.

Malaysia extended the movement control order ("MCO") twice during the month until 12th of May 2020 mainly to slow the spread of Covid-19. The Ministry of International Trade and Industry estimated that the economy was operating at only 45% of its operating capacity throughout April during the MCO. The government also announced a fourth Covid-19 related stimulus package of RM10bn to assist the SME sector. The FBMKLCI saw its first month on month ("MoM") gain this year in April 2020 at +4.2%. YTD however, the index is still down -11.4%. FBM KLCI ended the month at 1,407 points after falling to the lowest of 1,219 on 19th March 2020.

On commodities, oil took majority of the limelight especially on concerns regarding too much supply though was eased when the Organization of Petroleum-Exporting Countries and its allies ("OPEC+") announced a record deal to slash global output collectively 9.7mbpd off the market. Nonetheless, WTI made another history plunging to negative prices during the month as a result of a demand shock and dwindling storage capacity. All in, WTI settled at USD18.84 per barrel (-8%) while Brent at USD25.27 per barrel (11.1%) at the end of the month.

MARKET OUTLOOK AND STRATEGY

Globally, when more countries gradually reopen their economies because of slowing COVID-19 infection rates, this will generate positive sentiments. However, governments will continue to monitor closely on the relaxation of lockdown since no vaccine is available yet. Meanwhile, with global economy at its most challenging stage, the resurfacing of trade tensions between the US and China will not be helpful. Elsewhere, volatility reigns with the commodity & energy complexes facing unprecedented challenges.

Domestically, the MCO and the external developments will pose challenges to economic growth, corporate earnings and labour employment, which will cause continued volatility in the financial markets. The positive sentiments from the liquidity supports and slower COVID-19 infections rate need to be balanced with the economic challenges going forward. Monetary and fiscal policies will remain accommodative at this juncture to support domestic economy.

In terms of strategy, due to the volatile domestic equity market, we will focus on stocks with strong balance sheet, cashflows and good earnings growth potential, plus accumulating good quality stocks during weakness to benefit the fund in the longer term.

DISCLAIMER:

Based on the fund's portfolio returns as at 10 April 2020, the Volatility Factor (VF) for this fund is 11.5 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 8.8 but not more than 11.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2019 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2020.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 15 July 2017 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. This update does not amount to indicate that the SC has recommended or endorsed the Fund. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are stock market risk, liquidity risk, individual stock risk, interest rate risk, credit / default risk and issuer risk. These risks and other general risks are elaborated in the Master Prospectus.
