RHB RETIREMENT SERIES - MODERATE FUND

The Fund seeks to provide returns through a balanced mix of income and growth.

PROVIDER'S COMMENTS
EQUITY MARKET REVIEW

Asia ex-Japan rose 8.9% in April 2020 (YTD: -11.4%), with China (6.3%) and Korea (8.2%) providing a glimpse into the possible future recovery for the world as they attempt to make their way back to normalcy. The supply side in China is mostly back to capacity, while market demand is also showing signs of recovery to its year-ago levels.

FBM KLCI saw its first MoM gain this year in April 2020 at +4.2%. YTD however, the index is still down 11.4%. Average trading volumes in April 2020 reduced to RM2.58 billion versus the RM2.94 billion in March 2020 though still above the 1Q average of RM2.52 billion. FBM KLCI ended the month at 1,407 points after falling to the lowest of 1,219 points on 19 March 2020.

As of 30 April, Malaysia reported a total of 6,002 of Covid-19 cases, out of which 4,171 has been recovered and discharged while 1,729 cases were still active. A total of 102 deaths has been reported so far. Given that the number of new cases has been declining and strong recovery rate, Prime Minister announced the reopening of most of the economy sectors on 1 May 2020.

EQUITY MARKET OUTLOOK AND STRATEGY

The trade deal between US and China resurface again recently. Tensions have re-ignited as the former seeks to make the COVID-19 blame game a key focus for the elections as growth and low unemployment have imploded.

Malaysia has outperformed the MSCI ASEAN on a YTD basis. Although we believe that the market could do better as infection rate peaks, we believe that the market could still trend downwards from here towards the year end. We are expecting earnings growth to be negative this year as the companies suffer from COVID-19 disruption. We see value stocks and cyclicals having an opportunity to outperform now, but longer term we're still positive on quality & sustainable growth and themes.

FIXED INCOME MARKET REVIEW
US Treasuries

At the end of April 2020 close, the benchmark 2-, 5-, 10- and 30-year US Treasury (UST) were last traded at 0.195% (March 2020: 0.245% -5bps), 0.36% (0.38%; -2bps), 0.64% (0.67%; -3bps) and 1.28% (1.32%; -4bps) respectively. 10-year UST yields range traded in a 20bps range from 0.57% to 0.77% over the month of April 2020, post the 60bps rally we witnessed from the last 2 weeks of March.

Malaysian Ringgit Sovereign Bond

On the local rates, both Malaysia's sovereign papers ie; Malaysia Government Securities (MGS) and Government Investment Issues (GII) have stabilized and extended rally during the month after the sell-off in previous month appeared to diminish with attractive adjustment in term of yields have further ignite buying demand into local government bonds market.

Malaysian Ringgit Corporate Bond

In the Malaysian Ringgit corporate bond/sukuk space, overall monthly trading volumes were slightly higher as compared to previous month. Amid the sell-off in previous month, trading volumes were well respected as buying interest resumed on attractive valuation. Nevertheless, our observation noted that investors are seen to prefer selective credit and trades concentration focus on more higher graded credit especially in GG and AAA segment.

FIXED INCOME MARKET OUTLOOK AND STRATEGY

High fixed income exposure, only trade if there is better pipelines offering to enhance yield.

DISCLAIMER:

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Disclosure Document in relation to the RHB Retirement Series dated 2 December 2015 and its supplementary(ies)(if any) ("Disclosure Document"), before investing.
