MANAGER'S COMMENTS

MARKET REVIEW

Singapore held its General Election on 10 July 2020 with the incumbent party, the PAP, holding onto its supermajority seats at 61.2%. This election's showing was weaker than prior year's elections, as the opposition won 10 parliamentary seats and a reduced majority vote compared to prior year of 69.9%.

Singapore's 2Q20 GDP came in at -12.6% y/y, following a -0.3%/y contraction in the previous quarter. This was the sharpest contraction ever recorded and pushes Singapore into a technical recession. The circuit breaker measures significantly hurt the food services, retail and businesses compounded by the global travel restrictions which impacted trade, tourism and wholesale businesses. The services sector which contributes two thirds of the economy led the decline in the headline GDP growth figures.

On corporate news, the Monetary Authority of Singapore has called on Singapore banks to cap their dividends per share for FY20 at 60% of FY19 DPS, and offered shareholders the option to receive dividends to be paid for FY20 in scrip in lieu of cash. REITS reported their earnings with a clear trend showing the resilience of industrials, data center and logistics over the office and retail sectors.

Singapore's government has slashed GDP targets to -4% to -7% in 2020. In support of the economy, the government has released four stimulus packages within four months and the total package totaling at S\$100bn, which is 20% of gross domestic product. Strong support from the government comes in the form of reskilling of workers, job openings, and subsidies to households, rental waivers to commercial SMEs etc. Singapore's three phased exit strategy, which started on 2 June, is comparatively more cautious and gradual compared to other countries.

MARKET OUTLOOK & STRATEGY

Singapore stock market is a highly defensive market with strong blue-chip companies that is equipped with strong cash flow to pay high and sustainable dividends. The Target Fund is focused on income-producing equities that pay strong and sustainable dividend yields. These dividends represent a tangible return on investment and provides stability during uncertain times. At times, the fund can also be more tilted towards growth depending on the market cycle.

DISCLAIMER:

Based on the fund's portfolio returns as at 14 July 2020, the Volatility Factor (VF) for this fund is 15.1 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 12.8 but not more than 15.4 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2020 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2020.
