### MANAGER'S COMMENTS

#### EQUITY MARKET REVIEW

In Malaysia, August 2020 turned out to be a dreadful month for Malaysia equity market. Malaysia is one of the worst performing market for month of August 2020 dragged down by poor earnings particularly banking sector. Except for gloves, insurance, technology and plantations, all other sectors saw a sharp contraction in 2Q20 earnings due to the lockdown. FBM KLCI 100 declined by 78 points during the month of August 2020 to close at 1525.21 points. Apart from poor corporate earnings season, the index was dragged down by declined in glove companies' share price as vaccine discovery continue to steal the limelight.

#### EQUITY MARKET OUTLOOK AND STRATEGY

After the 17.1% contraction of gross domestic product (GDP) in 2Q20, Malaysia's economy may have bottomed out with the recovery of business activities. However, it is still too early to tell if it is a sustained rebound. We are seeing lower unemployment rate and positive export growth in tandem with the easing of the nationwide lockdown. In addition, market liquidity remained elevated in July 20 as M1 money supply grew by an astounding 15.7% YoY, its highest since 2011. This also marked three consecutive months of double-digit growth in liquidity which explains the buoyant market sentiment with retail participation exceeding 30%, resulting in record market trading volume and value. Malaysia's June 2020 unemployment rate declined MoM to 4.9% from a record-high of 5.3% in May 2020 as more sectors, including the services industry, reopened due to the implementation of the nation's recovery movement control order (RMCO) to revive the country's economy while curbing the Covid-19 pandemic. Earnings risks remain elevated, underscoring our preference for growth stocks and exporters over recovery beta.

#### FIXED INCOME MARKET REVIEW

##### *Malaysian Ringgit Sovereign Bond*

On the local rates, both Malaysia's sovereign papers that is Malaysia Government Securities (MGS) and Government Investment Issues (GII) started the month with positive vibes that saw yield curve stayed supported on further dovish tone by the US Fed and increased possibility of another rate cut by BNM as well as the well-bid GII 7-year auction tendered in late July 2020, giving further boost to the local market sentiments.

##### *Malaysian Ringgit Corporate Bond*

In the Malaysian Ringgit corporate bond/sukuk space, overall monthly trading volumes stayed around the previous month as investors switching on their exposure as lower cost of funding after consecutive OPR cut attracts corporates to tap in the primary issuances space. Investors were seen to selectively buying and rotating their position in the secondary market space to participate for the upcoming pipelines for better yield enhancement.

#### FIXED INCOME MARKET OUTLOOK AND STRATEGY

High fixed income exposure, only trade if there is better pipelines offering to enhance yield.

#### DISCLAIMER:

Based on the fund's portfolio returns as at 10 August 2020, the Volatility Factor (VF) for this fund is 9.1 and is classified as "Low". (source: Lipper) "Low" includes funds with VF that are above 3.3 but not more than 9.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2020 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2020.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the contents of the PHS and Master Prospectus dated 15 June 2017 and its supplementary(ies) (if any) ("collectively known as the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia ("SC") who takes no responsibility for its contents. The SC's approval or authorization, or the registration of the Prospectus should not be taken to indicate that the SC has recommended the fund. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors. If in any doubt, consult your banker, lawyer, stockbroker or an independent financial adviser.

The Manager wishes to highlight the specific risks of the Fund are liquidity risk of underlying investments, credit risk and inflation/purchasing power risk. These risks and other general risks are elaborated in the Master Prospectus.
