RHB CHINA BOND FUND - USD HEDGED CLASS

The Fund aims to maximise total return by investing in one (1) target fund.

MANAGER'S COMMENTS
TARGET FUND'S PORTFOLIO ACTIVITY

Over the month, the Target Fund Manager has increased their onshore exposure from 20% to 30% mainly through onshore longer dated rates bond and high quality IG credit as part of the hedging strategy (against offshore vol around US elections). The Target Fund Manager has cut down their HY exposure from 36% to 31% over the month (mainly in the offshore space). The Target Fund Manager has trimmed down their offshore property exposure from 28% to 23% over the month ahead of market volatilities. The Target Fund Manager is looking to add back if there is any further correction in the offshore market to take advantage of the dislocated price given the Target Fund Manager is fundamentally constructive on the sector.

The portfolio remains income-focused with a yield of 7.5% with an average investment grade rating. The Target Fund Manager sees portfolio resilience and credit quality increasing in importance for investments in the coming months. The Target Fund Manager's portfolio has been resilient, exhibiting low drawdowns amidst the volatility associated with the coronavirus given the diversification between the onshore and offshore Chinese bond markets.

TARGET FUND'S POSITIONING

The Target Fund Manager continues to remain constructive on the offshore China USD credit market in general on back of solid fundamentals, positive technicals and attractive valuations given offshore still offers yield pickup compared to onshore after FX hedging. However, the Target Fund Manager does expect to see pickup in volatilities around US elections in the offshore market and therefore remain cautious in the near term.

Looking forward, the Target Fund Manager thinks US election noise will pick up with US/China tensions getting more attention as they go through the presidential debates starting Sep 29th. The risk of contested election will pick up further lead to high risk premia in the offshore market in late Oct/November, which could create dislocation opportunities across risk assets. The Target Fund Manager is looking to further increase portfolio resilience by increasing onshore allocation (to approximately 35%) focusing on IG names (mainly through central SOEs) and increase their cash level to high single digit over the next 1 month. The Target Fund Manager sees pick up in volatility and dislocation as an opportunity to add risk in the offshore USD credit space, and they might increase their offshore exposure to 70-75% post sell-off to take advantage of the dislocation opportunities in November.

Within HY:

The Target Fund Manager is positive on China HY property. Demand nationwide has improved since the start of March and they expect credit profiles to be stable due to lower debt requirements over the next 12 months. Most companies under the Target Fund Manager's coverage have pre-funded their USD debt obligations in Jan-Feb 2020 and have received new NDRC quota for refinancing up to 1H21. The onshore bond market is functioning for these companies to refinance onshore bonds and the Target Fund Manager has seen yields of new issuances onshore at fair levels. Thus, the Target Fund Manager sees refinancing risk being low. Within the China HY Property sector, the Target Fund Manager is mainly positive on larger issuers with more manageable leverage and more diversified funding channels.

The Target Fund Manager is selective on onshore short-dated industrial names with strong fundamentals for diversification. Valuations also become more attractive compared to offshore space.

Within IG:

The Target Fund Manager is positive on China state owned enterprises (SOEs). The ramping up of fiscal stimulus onshore means infrastructure spending to boost the economy, which should be beneficial for these companies. The Target Fund Manager is selective on central SOEs across both onshore and offshore given valuations are comparable at the moment. The Target Fund Manager prefers offshore LGFV offshore names given valuations still look attractive at the moment. Besides, the NDRC quota control means the supply pressure is limited. As the Target Fund Manager goes into local SOEs, LGFVs, they have to assess both the systematic importance of the entity and also the fundamentals of the corporate.

DISCLAIMER:

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the contents of the PHS and Information Memorandum dated 15 May 2019 and its supplementary(ies) (if any) ("collectively known as the Information Memorandum") before investing. The Information Memorandum has been registered with the Securities Commission Malaysia ("SC") who takes no responsibility for its contents. The SC's approval or authorization, or the registration of the Information Memorandum should not be taken to indicate that the SC has recommended the fund. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Information Memorandum relates will only be made on receipt of a form of application referred to in the Information Memorandum. The Fund are only offered to "sophisticated investor" as defined in the Information Memorandum. For more details, please call 1-800-88-3175 for a copy of the PHS and the Information Memorandum or collect one from any of our branches or authorised distributors. If in any doubt, consult your banker, lawyer, stockbroker or an independent financial adviser.

The Manager wishes to highlight the specific risks of the Fund are management risk, liquidity risk, country risk and currency risk and the specific risks of the target fund are fixed income transferable securities risk, emerging market risk, restrictions on foreign investments risk, portfolio concentration risk, bond downgrade risk, sovereign debt risk, distressed securities risk, contingent convertible bond risk, credit risk of issuers, liquidity risk, currency risk, derivatives risk and securities lending risk. These risks and other general risks are elaborated in the Information Memorandum.
