RHB RETIREMENT SERIES - MODERATE FUND

The Fund seeks to provide returns through a balanced mix of income and growth.

PROVIDER'S COMMENTS
EQUITY MARKET REVIEW

October 2020 wasn't really a good month for Malaysia. In October 2020, FBM KLCI retraced -2.52% MoM to 1,467 points. Top gainers were Hartalega (+11.26%), Press Metal (+6.81%), PChem (+4.8%) and Top Glove (+4.20%), while laggards were Pet Dag (-12.66%), MISC (-12.13%), Tenaga (-9.14%) and RHB Bank (-7.44%). Foreigners net sold RM669mn worth of equities last month bringing YTD (October 2020) net outflow to RM22.97bn. Retailers were again the biggest net buyers in October 2020 but at a slower pace (RM456mn versus September 2020: RM1.44bn), while remaining as active participants of the market, accounting for 39.9% of trades (September: 38.2%), suggesting the impact of loan moratorium ending is not as bad as initially feared. Moving on to sector performance, despite a late sell-down on the final trading week of the October 2020, the tech and healthcare sectors remain the top performers.

EQUITY MARKET OUTLOOK AND STRATEGY

The resurgence of COVID-19 infections has resulted in lockdown measures of varying degrees being imposed which has raised concerns of a slower-than-expected global economic recovery. This implies that the prevailing coordinated efforts by governments to stimulate economies via both fiscal and monetary policies will stay for a prolonged period. Therefore, the flush of liquidity will continue to be positive for the equity market, while economic recovery slowly makes its way back to normalcy.

With the volatility risk in both our domestic market as well as regional/global markets, we continue to favor exporters namely in gloves and technology. Normalisation post a vaccine would likely further support GDP and top-line recovery.

FIXED INCOME MARKET REVIEW
Malaysian Ringgit Sovereign Bond

On the local rates, both Malaysia's sovereign papers that is Malaysia Government Securities (MGS) and Government Investment Issues (GII) curve were generally bull-steepened in most part of the month as positive auction of the new MGS 10-year benchmark has drove the short-tenor and up to the belly of the curve to be well demanded. This is on top of gradual market adjustment and expectation for lower policy rate going forward as the surge in number of COVID-19 cases shall warrant dovish monetary policy to curb potential shortfall in growth trajectory as well as to lend further support for domestic economy.

Malaysian Ringgit Corporate Bond

In the Malaysian Ringgit corporate bond/sukuk space, overall monthly trading volumes in secondary market space was lower on the back of pent-up demand to raise funds in primary issuances as lower cost of funding after consecutive OPR cuts attract corporates to tap in the market. Investors remained side-lined in the secondary market space to participate for noticeable upcoming primary issuances for better yield enhancement amidst at low interest rate environment.

FIXED INCOME MARKET OUTLOOK AND STRATEGY

High fixed income exposure, only trade if there is better pipelines offering to enhance yield.

DISCLAIMER:

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the contents of the PHS and Disclosure Document in relation to the RHB Retirement Series dated 2 December 2015 and its supplementary(ies)(if any) ("collectively known as Disclosure Document"), before investing. The Disclosure Document has been registered with the Securities Commission Malaysia ("SC") who takes no responsibility for its contents.
