MANAGER’S COMMENTS

MARKET REVIEW

October 2020 wasn’t really a good month for Malaysia. In October 2020, FBM KLCI retraced -2.52% MoM to 1,467 points. Top gainers were Hartalega (+11.26%), Press Metal (+6.81%), PChem (+4.8%) and Top Glove (+4.20%), while laggards were Pet Dag (-12.66%), MISC (-12.13%), Tenaga (-9.14%) and RHB Bank (-7.44%). Foreigners net sold RM669mn worth of equities last month bringing YTD (October 2020) net outflow to RM22.97bn. Retailers were again the biggest net buyers in October 2020 but at a slower pace (RM456mn versus September 2020: RM1.44bn), while remaining as active participants of the market, accounting for 39.9% of trades (September: 38.2%), suggesting the impact of loan moratorium ending is not as bad as initially feared. Moving on to sector performance, despite a late sell-down on the final trading week of the October 2020, the tech and healthcare sectors remain the top performers.

MARKET OUTLOOK AND STRATEGY

The resurgence of COVID-19 infections has resulted in lockdown measures of varying degrees being imposed which has raised concerns of a slower-than-expected global economic recovery. This implies that the prevailing coordinated efforts by governments to stimulate economies via both fiscal and monetary policies will stay for a prolonged period. Therefore, the flush of liquidity will continue to be positive for the equity market, while economic recovery slowly makes its way back to normalcy.

With the volatility risk in both our domestic market as well as regional/global markets, we continue to favor exporters namely in gloves and technology. Normalisation post a vaccine would likely further support GDP and top-line recovery.
