MANAGER'S COMMENTS

EQUITY MARKET REVIEW

Over in Malaysia, November 2020 was the second-best month for FBM KLCI in 2020 with a +6.53% gain (July: +6.85%) to 1,563 points, as gainers significantly outnumbered losers. Investors bought into value stocks which were bashed down year to date. The value rally saw YTD losers dominating the top gainers list.

EQUITY MARKET OUTLOOK AND STRATEGY

The rotation to value has already started but surely still has a long way to play out given the gaps in price performance between victims and beneficiaries of the pandemic are huge. The uncertain political backdrop continues to be a drag. It is, however, not the overriding investment consideration. We believe the potential sharp downgrade in corporate earnings will not happen unless the resurgence of COVID-19 is out of control. Fear that banking and gloves sectors' earnings will be badly affected by 2021 budget were not materialised was positive for the FBM KLCI's earnings. Index is expected to consolidate in the short term due to strong rebound from end October 2020. However, we do expect index to go higher as corporate earnings improve along with the gradual recovery in the economy and foreign inflows might back in Malaysia. Uncertainties are still prevailing due to the surging local COVID-19 that may force further lockdowns that would overshadow optimism over recent vaccine developments.

FIXED INCOME MARKET REVIEW

Malaysian Ringgit Sovereign Bond

On the local rates, both Malaysia's sovereign papers ie; Malaysia Government Securities ("MGS") and Government Investment Issues ("GII") curve were generally bull-steepened in most part of the month as positive auction of the new MGS On the local rates, both Malaysia's sovereign papers ie; Malaysia Government Securities ("MGS") and Government Investment Issues ("GII") curve were generally softer with yields seen to be drifted higher on less trading activities towards the end of the year as well as improvement in risk appetite following vaccine progress that saw global yields spiked and reversed entirely.

Malaysian Ringgit Corporate Bond

In the Malaysian Ringgit corporate bond/sukuk space, overall monthly trading volumes in secondary market notched lower during the month, market activities seen to be softer as market participants were inclined to be sidelined following higher yields in the government securities front. Market participants were also reluctant sellers in view of the yield-carry requirements for the portfolios.

FIXED INCOME MARKET OUTLOOK AND STRATEGY

Neutral on fixed income exposure, only trade if there is better pipelines offering to enhance yield.
