MANAGER'S COMMENTS

MARKET REVIEW

Major bourses, boosted by positive narratives, recorded strong gains in the month of November. These include heightened vaccines optimism, relatively good US macro data (strong PMI), optimism over the Donald Trump–Joe Biden transition and Janet Yellen's nomination to become the next US treasury secretary. The global equity markets gained 12.2% in November, bringing the year to date return to 9.4%. Energy was the best performing sector, gaining 25.4% in just a month. However, the sector still underperforming year to date with a -34.3% decline. Within regions, Asia ex-Japan (+8.0%) underperformed, while the US (+11.4%), Europe (+17.1%), UK (+16.4%) and Japan (+12.5%) outperformed.

Vaccine results from AstraZeneca and Oxford University brought another wave of optimism. Even if this vaccine is less effective (70% efficacy) than the other two (95% efficacy), it seems to be a far more practical solution from a logistical point of view, as it would be easier to distribute beyond the developed markets. The AstraZeneca vaccine only needs regular refrigerator temperature, whereas Pfizer and Moderna require special freezers (-70 degree Celsius) and ordinary freezers (-20 degree Celsius) respectively. Following encouraging trial results from Pfizer-BioNTech, Moderna and AstraZeneca, the FDA is likely to approve the Pfizer-BioNTech and Moderna vaccines in coming weeks with FDA Advisory Committee meetings on December 10 and possibly December 17 respectively.

Around 60-70% of the global population will need to be inoculated in order to fully break the link between the virus and economic activity. Given the scale (world population of 7.8 billion people) and the number of vaccines being developed requiring two doses (days between two doses ranging from 14-28 days), as well as the lack of global burden coordination, we may see mass vaccination globally occurring at a gradual pace, preventing a full normalization of mobility and cross-border flows. Looking more broadly, large shares of the population are likely to be vaccinated by late Q2 in all major developed markets.

Sentiment is being buoyed by two incrementally positive stories out from the United States. First, after weeks of delays, the US General Services Admission Administrator finally sent a letter to President-Elect Joe Biden, indicating that the agency is ready to make transition resources available to him and his team. News that Donald Trump seems ready to accept that the transition to Biden must begin was welcomed by the market. Adding to that President-Elect Joe Biden nominated former Federal Reserve Chair Janet Yellen to be the next US Treasury secretary. The relationship between Treasury and the Fed has been damaged and this move would help mend fences and improve coordination.

The highlight of the November 4-5 FOMC meeting minutes was the lengthy discussion of the Fed's strategy regarding asset purchases. For treasury purchases, there are three options: increasing the pace of purchases, extending the maturity of purchases, or lengthening the horizon over which purchases are conducted. The market expects the FOMC to extend the average maturity of its asset purchases at the December meeting, alongside introducing outcome-based forward guidance with thresholds somewhat softer than those for liftoff. FOMC participants agreed that the current monetary policy stance was appropriate and that an accommodative stance was "essential" to foster economic recovery.

The Regional Comprehensive Economic Partnership (RCEP), the world's largest trade agreement, was signed on 15 November 2020. With its 15 members, it covers a market of 2.2 billion people and \$26.2 trillion worth of global output. This accounts for 30% of global population and economy. China, Japan and Korea, as the largest economies, are the biggest gainers from the RCEP in absolute USD terms. Japan and Korea are also the major beneficiaries amongst the 15 RCEP members as measured by the incremental % change in real income, followed by Malaysia, Vietnam and Thailand.

The US fired another salvo at Chinese corporates. This executive order targets Chinese firms with relationships with the military. The measure prohibits US investors from buying or selling shares of these companies.

On 10 November 2020, China's market regulator, the State Administration for Market Regulation (SAMR), released draft Anti-Monopoly Rules aimed at internet platforms. The new draft seeks to drive healthier competition in China's platform/digital economy, better alignment of interests among merchants, consumers and platforms, as well as to foster a long-term sustainable industry growth. It comes after regulators delayed the IPO of Ant Group.

MARKET OUTLOOK AND STRATEGY

This month's underperformance can be attributed to the underweight in the selected auto industry names within the consumer discretionary sector. We continue to stay constructive on equities with a cautious optimism amidst the ongoing rhetoric surrounding the trade war and the containment of the COVID-19 pandemic.

Our strategy remains intact where the fund will continue to invest in quality companies with excellent balance sheet that are trading at a deep discount as a result of COVID-19. We are also turning more positive and have reduced our cash positions that was held since the COVID-19 outbreak. We remain opportunistic and prefer stocks that have healthy balance sheet, visible earnings growth, and valuations support.

DISCLAIMER:

Based on the fund's portfolio returns as at 10 November 2020, the Volatility Factor (VF) for this fund is 13.9 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 12.8 but not more than 15.4 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2020 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2020.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the contents of the PHS and Master Prospectus dated 6 October 2017 and its supplementary(ies) (if any) ("collectively known as the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia ("SC") who takes no responsibility for its contents. The SC's approval or authorization, or the registration of the Master Prospectus should not be taken to indicate that the SC has recommended the fund. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors. If in any doubt, consult your banker, lawyer, stockbroker or an independent financial adviser.

The manager wishes to highlight the specific risks of the Fund are market risk, country risk, currency risk, equity risk, regulatory risk, liquidity risk and equity related securities risk. These risks and other general risks are elaborated in the Master Prospectus.
