The Fund aims to maximise returns at its maturity date from a concentrated portfolio of global debt instruments.

**MANAGER'S COMMENTS**

**MARKET REVIEW**

As widely expected by the investment community, the Federal Open Market Committee ("FOMC") has decided to reduce the pace of monthly asset purchase by USD10b, to USD75b, in January 2014. Market reaction to this announcement was somewhat muted, as "tapering talk" has been a common conversation since late May 2013. At close, the 2-, 5-, 10- and 30-year UST printed at 0.38% (November: 0.29%), 1.74% (1.38%), 3.03% (2.75%) and 3.97% (3.83%) respectively.

Most of the economic data released in December was positive. Real GDP growth for 3Q2013 came in stronger than consensus at 4.1% annualized (2Q2013 annualized 2.5%), mainly due to higher inventory growth. ISM Manufacturing Index for November also came in stronger at 57.3 (56.4 in October), suggesting that growth momentum is likely to sustain to 2014. Employment situation continues to show gain in November with unemployment rate further eased to 7.0%, a commendable drop from 7.3% reported a month ago. On the other hand, Consumer Price Index ("CPI") in November posted a flat reading MoM after dipping 0.1% in October, mainly due to the softening energy price in the North America.

The FOMC is trying to maintain policy accommodation even as it cuts back on QE. While monthly asset purchases will be cut back by USD10b, new forward guidance now indicates a lower expected Fed funds rate in 2015 and 2016. FOMC signaled a strengthening in its commitment to hold down Fed Funds rate as long as inflation is soft. Further cuts in QE are "likely" at future meetings as long as economic data on employment and inflation meet FOMC expectations. Fed Chairman Ben Bernanke indicated that a "measured reduction" would be roughly a USD10b cut in the pace of purchases at each FOMC meeting. We think a reasonable expectation is that the total QE program will end by 2014 and Fed will keep the front end of the yield curve anchored for longer than previously anticipated.

Meanwhile, Asian USD denominated credit were also firmer in December, with both the Investment Grade and High Yield spreads compressing by about 5-10 bps and 10-15 bps respectively.

**DISCLAIMER:**

As this is a close-ended fund, units are no longer available for sale on the basis of the Prospectus dated 14 January 2013. Investors are advised to read and understand the contents of the Prospectus dated 14 January 2013, which has been registered with Securities Commission who takes no responsibility for its contents, before investing. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Prospectus relates will only be made on receipt of a form of application referred to in the Prospectus. For more details, please call 1-800-88-3175 for a copy of the Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the principal risk factors of the funds are credit/default risk, currency risk, interest rate risk, liquidity risk, market risk, country risk, inflation/purchasing power risk, concentration risk and mismatch risk. These risks and other general risk are elaborated in the Prospectus.
