**MANAGER'S COMMENTS**

**MARKET REVIEW**

In Oct, financial markets volatility heightens on the back of investors concern on global growth after IMF downgrade global economic forecast, fear of Fed interest path acceleration and market liquidity. S&P500 Index fell circa 7% intra month before recover to closed +2.32% in Oct. Brent crude oil fell 28% since June to \$82/barrel intensify the October market selloff. FBM KLCI edged up marginally, +0.48% mom to 1855pt while YTD still recorded flattish return, fell -0.63%. In the meantime, Small Cap Index ended in negative territory after strong rally YTD and warnings from research houses on lofty valuation, fell 5.20% mom and +12.75% YTD, KLCI Fledgling Index decline 4.57% mom and +25.11% YTD. The KLCI lacklustre trend underperformed ASEAN regional markets but outperformed some of the North Asia peers. Within Asia region, India, Philippines and Thailand were best performers, advanced circa +31%, +22% and 21% YTD respectively while Kospi, HSCFI, and Nikkei 225 were underperformers, fell 2%, 0.56% and +0.75% YTD respectively.

**MARKET OUTLOOK AND STRATEGY**

PM Najib budget announcement centred on govt efforts in fuel subsidy rationalization, infra projects rollout and impact of GST implementation in early 2015 to rein in fiscal deficit. We maintain our positive view on equity market and envisage bottoming of corporate earnings downgrade and expect gradual recovery in 2015.

On regional front, latest HSBC Markit China manufacturing PMI came in unchanged at 50.2 in Sept vs 50.2 in Aug and 51.7 in July, while the non-manufacturing PMI weaken slightly to 54.0 in Sept vs 54.4 in Aug. We envisage China macro data continue to be mixed with soft patch due to Chinese govt determination to rebalance the economy. We expect the Chinese govt will react with selective/targeted easing should cyclical weakness threaten GDP growth and unemployment. EM reliance on China growth for commodities export may face headwinds in 2014.

On sector basis, we continue to favour consumer, tech, healthcare, industrial and telco while selectively bullish bias on infra related construction stocks. We foresee 2014 to be a reform year for regional economies and Malaysia govt to rollout targeted infra projects to spearhead the economy and continue its reform agenda including subsidy rationalization which augur well for the economy. Increase market volatility globally will create capital misallocation and outflow of funds from emerging markets, thus misprice securities from fundamental. We remain cognizant of prevalent risks but look into adding bombed-out good fundamental stocks to enhance alpha

**DISCLAIMER:**

Based on the fund's portfolio returns as at 15 October 2014, the Volatility Factor (VF) for this fund is 8.2 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 10.6 but not more than 13.0. (source: Lipper) The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are country risk, currency risk, market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
