Top 10 holdings includes McDonald's Corp, Amazon.com Inc, Comcast Corp, Walt Disney, Home Depot Inc and Ford Motor.

Singapore dollar was down 0.87% against the US dollar this month.

MALAYSIA BOND OUTLOOK

Ringgit government bond continues to trend tighter as market believes Bank Negara's tightening cycle has ended. In the IMF annual meeting early October, Bank Negara's governor - Tan Sri Dato Sri Dr. Zeti - was quoted saying Malaysia still needs accommodative interest rate policy to support the country's growth. As a result, the local government bond market bullish flattened with long-end yields compressed more than short-end yields. At close, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year Malaysia Government Securities ("MGS") were traded at 3.50% (September: 3.47%), 3.63% (3.67%), 3.77% (3.80%), 3.83% (3.89%), 4.15% (4.21%), 4.25% (4.31%) and 4.63% (4.71%) respectively.

On the domestic economic front, the Budget 2015 announced in October further emphasized on meeting fiscal deficit target in 2014 (3.50% of GDP) and 2015 (3.00% of GDP), by gradually removing fuel subsidy as well as implementation of Goods and Services Tax ("GST") in April 2015. During the IMF annual meeting in Washington, BNM Governor Dr. Zeti comments were dovish, nothing that risks to global growth have increased and domestic growth will moderate closer to 5.00% in 2015 due to some moderation in consumption. While implementation of GST will likely to increase inflation in the short term, BNM still sees long term inflation trend of 3.00% as achievable. Both her comment as well as the temporary fall in September CPI to 2.60% YoY (August: 3.30% YoY) reinforces the rate hike pause in November. The last BNM Monetary Policy Committee meeting for the year is scheduled on 6th November.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 October 2014, the Volatility Factor (VF) for this fund is 3.7 and is classified as "Low". (source: Lipper) "Low" includes funds with VF that are above 1.1 but not more than 7.9 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

As this is a close-ended fund, units are no longer available for sale on the basis of the Prospectus dated 1 March 2011.

Investors are advised to read and understand the contents of the Prospectus dated 1 March 2011, which has been registered with the Securities Commission who takes no responsibility for its contents. Amongst others, investors should read the Prospectus for further details of the capital protection* structure and to consider the fees and charges involved before investing in the Fund. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. The capital of the Fund is not guaranteed and is exposed to the credit/default risk of the issuer of the ZNIDs. The investment returns of the Fund are not guaranteed and are still subject to investment risks and are exposed to the credit/default risk of the issuer of the option. The capital protection* only applies to investors who hold their investments until the Fund's Maturity Date. Any redemption from the Commencement Date but before the Fund's Maturity Date will be based on the Net Asset Value of the Fund on the relevant Valuation Day and will be charged a repurchase charge, in which case the capital protection* does not apply. Further, if the fund is terminated earlier than the Maturity Date, the capital protection* will not apply to any investor. There may be dilution of performance due to the capital protection* structure being in place, as compared to a conventional fund without capital protection*. Units will only be issued upon receipt of an application form referred to in and accompanying the Prospectus. For more details, please call 1-800-88-3175 for a copy of the Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks for the Fund are credit/default risk, interest rate risk, risk of early termination, option risks, legal risk, liquidity risk, prepayment and commitment risk, currency risk, capital and returns are not guaranteed. These risks and other general risks are elaborated in the prospectus.

This factsheet is prepared for information purposes only. It does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive it. Past performance is not necessarily a guide to future performance. Returns may vary from year to year.

**Investors are advised that the Fund is not a guaranteed fund. This capital protected fund is provided through investments in ZNIDs and not by a guarantee. Consequently, the return of capital is SUBJECT TO the credit/default risk of the issuers of the ZNIDs and may result in losses.*
