RHB-OSK CAPITAL PROTECTED WORLD MINING FUND (formerly known as OSK-UOB CAPITAL PROTECTED WORLD MINING FUND)

This Fund aims to provide capital appreciation over the medium term whilst protecting investors' capital on the Maturity Date.

MANAGER'S COMMENTS**MARKET & PORTFOLIO PERFORMANCE**

The BGF World Mining Fund returned +3.7% during the month, underperforming its benchmark, the Euromoney Global Mining Index, which returned +4.8%.

June was a relatively solid month for the base metals with copper, aluminium and zinc rising +2%, +3% and +8% respectively. Nickel and tin were the only laggards, seeing declines of -1% and -3% respectively. Nickel's small decline can be attributed to a pause-for-breath in investor sentiment following its +37% price increase since the beginning of the year. It's possible we will see this tentative approach continue as uncertainty builds around the outcome of the upcoming Indonesian election (July 9th), and thus, the longevity of the current export ban.

The market continued to focus on the weakening iron ore price in June, however we saw some recovery during the final days of the month as inventories held at steel mills hit 2 year lows. This was also helped somewhat by an increase in Chinese infrastructure spend, one of the government's 'mini-stimulus' initiatives. Iron ore finished the month at \$94.90/t (62% Fe), representing a +3.4% rise over the month.

In other news, the mine strike in South Africa, which began on 23rd January and involved 70,000 workers, ended during the final week of the month. Joseph Mathunjwa, President of the Association of Mineworkers and Construction Union (AMCU), said that the union had accepted a three year no-strike wage agreement through to 2016. It is thought that the legacy of the strike will be felt for many months and the industry will be watching to see if there are any issues in the ramp up to full production. Following the announcement, both palladium and platinum prices suffered from some selling.

Much of the Fund's underperformance was driven by our underweight to a number of precious metals companies. Gold performed well during the month, supported by a number of factors, including safe haven buying as a result of the unrest in Iraq and weakness in the US\$, which has an inverse relationship with the gold price. It was also supported by more dovish comments from the Chair of the US Federal Reserve (Fed), Janet Yellen, on the timing and trajectory of US interest rate changes. The gold price rose +6%, finishing the month at \$1,317/oz.

A second detractor from performance was the Fund's holding in Iluka Resources, a mineral sands company. Iluka made an offer to acquire Kenmare Resources, an industrial minerals company, which Kenmare subsequently rejected. Iluka's share price suffered as a result. The Fund's underweight to BHP Billiton was the greatest contributor to performance during the month as investors rotated away from this more defensive company as the market rallied.

TRANSACTIONS & PORTFOLIO ACTIVITY

In June we rotated some of the Fund's iron ore exposure, adding to our position in Fortescue, while reducing holdings in both Rio Tinto and Vale. We also continued to reduce the Fund's exposure to some of the smaller cap miners.

MARKET OUTLOOK

The mining sector has significantly lagged the general equity market in recent years. However, a number of the downside risks for this sector have reduced (albeit not disappeared). The industry has made good progress in refocusing its strategy: operating costs have been aggressively targeted and investment in projects reassessed. Many commodities are trading close to or below their marginal cost of production, implying that price downside should be limited, in the absence of a collapse in demand. We see 2014 as a year of transition, some of which has begun to materialise with the large cap diversified miners exceeding analyst earnings expectations in 1Q.

The market has been focussed on liquidity concerns and increasing volatility in China, however, it is important to highlight the supportive backdrop of synchronous global growth, which in the past has bolstered commodity prices. Mining companies are trading on an undemanding valuation and an attractive dividend yield. With capital expenditure rolling off, management are guiding investors towards rising free cash flows.

FIXED INCOME REVIEW & OUTLOOK

US Treasuries ("UST") bearish flattened in June, as consumer price inflation was warmer than expected in May. However, geopolitical tension in the Middle East kept the 10-year UST firmly at 2.53%, as investors sought for safe heaven protection. At close, the 2-, 5-, 10- and 30-year UST were traded at 0.46% (May: 0.38%), 1.63% (1.54%), 2.53% (2.48%) and 3.36% (3.33%) respectively.

The local bond market bullish flattened in June with strengthening Ringgit and low market volatility prompted for yield pick-up trades. At close, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS were traded at 3.51% (May: 3.48%), 3.72% (3.72%), 3.91% (3.94%), 4.03% (4.03%), 4.33% (4.36%), 4.40% (4.59%) and 4.74% (4.89%) respectively. Similar to the strong performance of MGS, Government Investment Issues ("GII") also bullish flattened with 3-, 5-, 7-, 10-, 15-year and 20-year benchmark yields transacted at 3.65% (May: 3.67%), 3.88% (3.85%), 4.10% (4.12%), 4.24% (4.21%), 4.53% (4.50%) and 4.70% (4.85%) respectively.

Despite the sharp downward revision of 1Q2014 GDP to -2.9% YoY in June (from -1.0% YoY last month), most of the economic data released in June was pointing to a modest recovery. Both ISM Manufacturing Index as well as Industrial Production ("IP") came in stronger than expected in May, with the former reporting at 55.4 (Apr: 54.9, consensus: 55.5) and the latter at 0.6% MoM (Apr: -0.3% MoM, consensus: 0.5% MoM). The manufacturing sector appears to be making a comeback. Employment situation was largely unchanged with unemployment rate held steady at 6.3%.

On the domestic economic front, April trade surplus narrowed only slightly as exports outpaced imports. April exports surged 18.9% YoY (Mar: 8.3% YoY) partly on base effects, above consensus of 9.7% YoY. Imports also rose 5.0% YoY (Mar: 0.5% YoY) above consensus of -0.5% YoY. With April seasonally adjusted export levels 4% above 1Q2014 levels, the continued resilience of exports is in line with improving external demand. Also, April IP up sequentially to 4.2% YoY (Mar: 4.3% YoY), in line with market consensus. Combining the positive trade surplus with strong IP reported in April, accelerating growth momentum points to a strong start to 2Q2014 GDP. May CPI inflation edged down to 3.2% YoY (April: 3.4%). Lower YoY inflation was led by F&B, Utilities and Communication. Despite the weaker CPI level, MPC's concern is still on financial imbalances, which is likely to see the Central Bank to take interest rate action in the coming meeting.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 June 2014, the Volatility Factor (VF) for this fund is 2.5 and is classified as "Low". (source: Lipper) "Low" includes funds with VF that are above 1.3 but not more than 7.9 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2013 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2014.

As this is a close-ended fund, units are no longer available for sale on the basis of the Prospectus dated 17 August 2010.

Investors are advised to read and understand the contents of the Prospectus dated 17 August 2010, which has been registered with the Securities Commission who takes no responsibility for its contents. Amongst others, investors should read the Prospectus for further details of the capital protection* structure and to consider the fees and charges involved before investing in the Fund. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. The capital of the Fund is not guaranteed and is exposed to the credit/default risk of the issuer of the ZNIDs. The investment returns of the Fund are not guaranteed and are still subject to investment risks and are exposed to the credit/default risk of the issuer of the option. The capital protection* only applies to investors who hold their investments until the Fund's Maturity Date. Any redemption from the Commencement Date but before the Fund's Maturity Date will be based on the Net Asset Value of the Fund on the relevant Valuation Day and will be charged a repurchase charge, in which case the capital protection* does not apply. Further, if the fund is terminated earlier than the Maturity Date, the capital protection* will not apply to any investor. There may be dilution of performance due to the capital protection* structure being in place, as compared to a conventional fund without capital protection*. Units will only be issued upon receipt of an application form referred to in and accompanying the Prospectus. For more details, please call 1-800-88-3175 for a copy of the Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks for the Fund are credit/default risk, interest rate risk, risk of early termination, option risks, legal risk, liquidity risk, prepayment and commitment risk, currency risk, country risk, capital and returns are not guaranteed. These risks and other general risks are elaborated in the Prospectus.

This factsheet is prepared for information purposes only. It does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive it. Past performance is not necessarily a guide to future performance. Returns may vary from year to year.

*Investors are advised that the Fund is not a guaranteed fund. This capital protected fund is provided through investments in ZNIDs and not by a guarantee. Consequently, the return of capital is SUBJECT TO the credit/default risk of the issuers of the ZNIDs and may result in losses.
