MANAGER'S COMMENTS

MARKET REVIEW

Asian investment grade corporates performed well in May on positive sentiment led by India (election euphoria) and catch up of previous underperformance in BBB-rated Chinese credits. Lower supply pipeline also lifted valuation. We saw just US\$3 billion of investment grade corporate issues priced in May compared to versus US\$24 billion in April.

Overall conditions for credit may stay supported given low volatility, low rates, low growth and expectations of Euro & Japan QE. However, valuations have started looking a bit stretched from historical standards, especially given that the fundamentals are yet to turn around, though default rates stay low. Asia Investment Grade spreads continued to grind in tighter in May to 180bps - tightest last seen in April 2011. In our view, current pricing leaves little room for disappointments and we prefer to remain selective on credit risk.

STRATEGY

We will continue to be defensive and stay nimble in light of market volatility while overweighting on good quality high grade credits. The RHB-OSK Focus bond funds will await opportunistically for entry points as well as participate in primary issues with attractive pricing to deploy cash selectively while taking profit on existing holdings.
