The Fund aims to maximise returns at its maturity date from a concentrated portfolio of global debt instruments.

MANAGER'S COMMENTS**MARKET REVIEW**

US Treasuries ("UST") continue to rally in May, as the revised 1Q2014 Real GDP was even weaker than previous releases, nudging down to -1% annualized YoY (4Q2013: +2.6% YoY). At close, the 2-, 5-, 10- and 30-year UST were traded at 0.38% (April: 0.41%), 1.54% (1.68%), 2.48% (2.65%) and 3.33% (3.46%) respectively.

Both the US ISM Manufacturing and Non-Manufacturing Index inched up higher in April, with the former reporting at 54.9 (March: 53.7, consensus: 54.3) and the latter at 55.2 (March: 53.1, consensus: 54.2). The great bulk of the nation's economy is picking up speed this spring but is not yet forcing business to add employees at a great rate. Actual non-farm payroll in April added 288k jobs (March: 203k, consensus: 215k) and unemployment fell to 6.3%, while jobless claim further reduced to 300k on the last week of May, compared to 329k a month ago.

Housing Starts, Existing Home Sales and New Home Sales were also showing modest gains. Housing Starts increased by 1.072M in April (March: 0.947M, consensus: 0.980M), Existing Home Sales increased by 4.65M (March: 4.59M, consensus: 4.69M) while New Home Sales increased by 433k (March: 407k, consensus: 420k). The housing sector has been bumping along so far this year, though the reports are a welcome exception of strength. On the consumption side of the economy, retail sales were weak at 0.1% MoM growth in April (March: 1.5%, consensus: 0.4%). Coupled with the still weak Consumer Price Index ("CPI" Apr: 0.3% MoM, March: 0.2% MoM, consensus: 0.3% MoM) and Producer Price Index ("PPI" April 0.6% MoM, March: 0.5% MoM, consensus range: 0 – 0.4% MoM), it appears that consumption is still oscillating from the adverse winter.

In the US, 1Q2014 GDP was revised down on weaker inventories, the first quarterly contraction since 2011. However, the recent housing data should alleviate Fed's concern, while labor market, consumption and durable goods numbers point to a rebound in 2Q2014. We do not expect the weather-related softness in 1Q2014 to translate to a one-to-one increase in growth for the rest of the year. This somewhat slower growth profile does not change our view on the Fed, we still expect the interest rate to normalize in 2H2015. The labor market continues to strengthen more quickly than Fed's forecast, and after the most recent inflation reports, the headline PCE price index is up 1.6% YoY, while core is up 1.4%, very close to the Fed's year-end forecast of 1.5% YoY. Finally, Fed Presidents Dudley and Williams have both recently indicated that the Fed might not stop re-investing its portfolio run-off after the first rate increase.

The European Central Bank ("ECB") meeting in early June along with coming US payroll data should remain as the markets' main focus. While we expect the ECB to cut rates and announce a new lending scheme, we do not expect a large-scale asset purchases at this juncture. Separately, we now expect the Bank of Japan ("BoJ") to remain on the sidelines for the rest of 2014, unless output gap widens again.

DISCLAIMER:

As this is a close-ended fund, units are no longer available for sale on the basis of the Prospectus dated 13 August 2013. A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Prospectus dated 13 August 2013 and its supplementary(ies) (if any) ("the Prospectus") before investing. The Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Prospectus relates will only be made on receipt of a form of application referred to in the Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the principal risk factors of the funds are credit/default risk, currency risk, interest rate risk, market risk, country risk, inflation/purchasing power risk, concentration risk and mismatch risk. These risks and other general risk are elaborated in the Prospectus.
