INVESTMENT STRATEGY

The Fund adopts a narrowly focused strategy investing in companies in the financial services sector, but it is broadly diversified in terms of geographic exposure. The global financial sector continues to recover from the distressed levels in the midst of the crisis as operating conditions improved. The longer term outlook is positive, however, there are some near term challenges, namely the sovereign debt problems in Europe and pending implementation of regulatory reforms. The fund continues to target opportunities that are less impacted by the near term challenges and has an attractive mix of high quality companies with strong underlying customer franchises. In addition the Fund continues to target leading companies with exposure to high growth emerging markets. We have positioned the Fund in higher growth fiduciary services segments and for ongoing improvement in credit loss trends which should support longer term growth.
