**Panasonic (Japan),
Pultegroup (US),
Fiat Chrysler (Italy),
DR Horton (US), and
Actavis (US)**

A few drags on performance include:

**Greenield (Malaysia),
Schlumberger (US),
Hyundai Development (South Korea),
Gilead Sciences (US), and
Malaysia Steel (Malaysia)**

INVESTMENT STRATEGY

Global equities recovered from sharp decline in October, as investors responded positively to the prospect of increased monetary policy easing in Europe and a surprise interest rate cut in China. A dovish set of remarks from European Central Bank ("ECB") President Mario Draghi stated that policy makers need to bring inflation to target without delay and that further monetary easing could help spur the euro zone's recovery. In China, the HSBC flash PMI slipped to a reading of 50 which indicated manufacturing activity flat in November with new export orders and employment weakening. In response to a slowing domestic and global economy, the People's Bank of China ("PBoC") unexpectedly cut the benchmark interest rates for the first time in two years. The 1 year deposit rate was cut by 25bps to 2.75% and the 1 year lending rate was cut by 40bps to 5.6%. The PBoC will not consider further rate cuts until fourth quarter macroeconomic data released. In the US, S&P 500 index climbed to record high due to encouraging domestic economic releases. The economy in the US expanded 3.9% annualized rate, more than estimated in the third quarter, reflecting bigger gains in consumer spending and business investment. More jobs and cheaper gasoline are giving households the means to boost spending even further going into the all important holiday shopping season, benefiting retailers. Businesses are investing in new equipment to meet that demand, even as markets cool overseas. In Japan, the economy tipped into technical recession as the GDP shrank an annualized 1.6% in third quarter. Japan Prime Minister Shinzo Abe called an early election and delayed a second planned sales tax increase for 18 months.

Leading indicators suggest that the global recovery is still taking place mainly driven by improvement in developed markets. However, in the short term basis, in particular second half of 2014, equity market might experience higher volatility and valuation adjustment once the Fed completely exit from its asset purchase program as that will trigger the investors to speculate the probability and timing of the interest rate hike. The US economy growth expectation has been revised up from 2.6% to 2.7% in 2014 with unemployment rate to improve to 6.5% in 2014 and 5.95% in 2015 as the business and manufacturing activities expand. Improvement in household wealth is expected to anchor consumer expenditure on real estate and automobiles. The European economy is showing signs of recovery with growth expectation of 1.1% by the ECB, supported by less austerity and continued strength in trade across the region. Nonetheless, the high unemployment rates, structural disparity between the core and peripheral European countries as well as the building deflationary forces remain a concern. The ECB will remain supportive with reflationary policies. Growth in emerging market and developing economies is expected to increase to 5.1% in 2014 and to 5.4% in 2015, according to IMF. Growth in China is expected to moderate to around 7.5% amid the economic transition and largely hinge on the execution of the reform blue print detailed in the Third Plenum.

Global portfolio adjustments continue from bonds to equities, despite equities being fully valued, mainly supported by confident on global economic growth outlook whilst offsetting rising bond yields. Equities in developed markets and North Asia in particular are likely to outperform on solid recovery whilst the Fed tapering will take a toll on emerging markets earnings growth due to higher borrowing costs and currency fluctuation. Emerging markets equities are likely to suffer from high volatility in the short term, however, as developed markets growth accelerate, Emerging markets should enjoy the spillover effect.

The key strategy would be to be nimble at adding or initiating new positions in well managed companies that demonstrate sustainable business model and dividend payout with competitive advantage.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 November 2014, the Volatility Factor (VF) for this fund is 8.7 and is classified as "High". (source: Lipper) "High" includes funds with VF that are above 10.6 but not more than 13.0. (source: Lipper) The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 1 December 2014 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are country risk, currency risk, market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
