**RHB-OSK GLOBAL FORTUNE FUND (formerly known as RHB GLOBAL FORTUNE FUND)**

This Fund aims to provide total return from dividend income, option premiums and capital appreciation, sustainable distributions and typically lower portfolio volatility compared to a normal equity investment.

**MANAGER'S COMMENTS**

**MARKET REVIEW AND OUTLOOK**

Global equity markets posted negative returns in July 2014 after experiencing a rather steady upwards trend since February. During the last few trading days in July, markets turned sour and expressed their anxiety towards early rate hikes in the US and increased geopolitical tensions in Eastern Europe and Middle East.

2014 has seen significant geopolitical tensions arising as a result of Russia's intervention in Ukraine in Q1, while in Q2 we have witnessed the resurgence of violence and unrest in Iraq. Both situations clearly have the capacity to worsen should the situation deteriorate further. A deepening crisis in Ukraine could negatively affect growth in developed markets in three key respects - the price of energy (now additionally under strain following the outbreak of violence in Iraq), increasing stress in the financial system, and deterioration in economic sentiment.

Despite the US Federal Reserve's (Fed) tapering program, monetary policy is likely to remain expansive for the foreseeable future. However, with the economic recovery running at different speeds in the US, UK, euro zone and Japan, both central bank policy and inflation expectations have clearly begun to diverge. This process could gather pace over the coming quarters.

In Europe, central bankers are still fighting deflationary forces; the latest interest rate cut by the European Central Bank (ECB) underlines policymakers' determination to fight looming deflation in the euro zone. The ECB is the first major central bank to have introduced negative interest rates, plus a new, targeted longer term refinancing operation (TLTRO), which intends to boost credit supply and decrease the cost of funding.

**DISCLAIMER:**

Based on the fund's portfolio returns as at 15 July 2014, the Volatility Factor (VF) for this fund is 9.3 and is classified as "Moderate". (source: Lipper) "Moderate" includes funds with VF that are above 7.9 but not more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Replacement Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are interest rate risk, general market risk, stock and issuer risk, currency risk and country & transfer risk, fund manager risk and regulatory risk. These risks and other general risks are elaborated in the Master Prospectus.

This factsheet is prepared for information purposes only. It does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive it. Past performance is not necessarily a guide to future performance. Returns may vary from year to year.
