**RHB-OSK GLOBAL FORTUNE FUND (formerly known as RHB GLOBAL FORTUNE FUND)**

This Fund aims to provide total return from dividend income, option premiums and capital appreciation, sustainable distributions and typically lower portfolio volatility compared to a normal equity investment.

**MANAGER'S COMMENTS**

**MARKET REVIEW AND OUTLOOK**

Equity markets finished sideways in April 2014. A mix of soft economic data and lingering concerns about any Russia-Ukraine fallout limited potential returns. European stocks continued their outperformance, again topping market returns in April. The improving economic scenario across the region has helped fuel risk appetite, although increasing deflationary pressures and political turmoil have kept a lid on performance. Japan was the worst performing region last month and also year-to-date as earnings expectations have weakened. April's purchasing managers' index (PMIs) suggest that manufacturing across the emerging world disappointed last month. While there are signs that manufacturing growth in the smaller Emerging Markets is starting to lose steam, the weakness remains concentrated in the larger BRIC economies.

A deep pessimism drove down stock prices of Emerging Markets to record-low valuations, indicating the largest valuation discount since the 1998 currency crisis. History teaches that strongly depressed valuations can become a turning point for equity markets and hence offer attractive entry levels. The Federal Reserve (Fed) faces a difficult task over the next few years as it starts to tighten its loose monetary policy of the past five years. It has set out and communicated a clear strategy and timetable to do so. If the economy evolves as expected, Quantitative Easing measures will end in late 2014 and interest rate increases will start in early 2015. The plan however, is subject to substantial risks and uncertainties.

**DISCLAIMER:**

Based on the fund's portfolio returns as at 15 April 2014, the Volatility Factor (VF) for this fund is 9.4 and is classified as "Moderate". (source: Lipper) "Moderate" includes funds with VF that are above 7.9 but not more than 10.6 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 31 December 2013 which is calculated once every six months and is valid until its next calculation date, i.e. 30 June 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Replacement Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are interest rate risk, general market risk, stock and issuer risk, currency risk and country & transfer risk, fund manager risk and regulatory risk. These risks and other general risks are elaborated in the Master Prospectus.

This factsheet is prepared for information purposes only. It does not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive it. Past performance is not necessarily a guide to future performance. Returns may vary from year to year.
