

RHB-OSK GROWTH AND INCOME FOCUS TRUST (formerly known as OSK-UOB GROWTH AND INCOME FOCUS TRUST)

This Fund aims to achieve maximum total returns through a combination of long term growth of capital and current income.

INVESTOR PROFILE

This Fund Is Suitable For Investors Who:

- seek long term capital appreciation through investments in high growth potential small cap securities whilst requiring the flexibility of a conservative portfolio of fixed income securities in order to capitalise and adapt to prevailing market conditions; and
- are willing to accept slightly higher risk in their investments than that normally associated with a general balanced fund in order to achieve long term capital growth and income.

INVESTMENT STRATEGY

- 30% - 70% of NAV: Investments in securities of companies with market capitalization of not more than RM750 million ("small cap securities").
- 30% - 70% of NAV: Investments in fixed income securities, money market instruments, cash and deposits with financial institutions.

MANAGER'S COMMENTS

FUND REVIEW

GIFT's NAV posted a gain of 2.31%, outperforming its benchmark's (50% FBM Fledgling Index + 50% 12-month fixed deposit) increase of 1.69%. The outperformance was mainly due to stock selection.

MARKET REVIEW

In Sept, S&P500 Index hit all-time high of 2019pt, buoyed by Alibaba listing which raised US\$25b in the world largest IPO. Alibaba ranked after Google as world's 2nd largest internet company with market cap surpassing Facebook, Twitter and Amazon. FBM KLCI eased marginally, -1.06% mom to 1846pt while YTD still recorded flattish return, fell -1.11%. In the meantime, Small Cap Index ended flat in the month Sept after strong rally YTD and warnings from research houses on lofty valuation, +0.33% and +18.93% YTD, KLCI Fledgling Index +2.38% mom and +31.09% YTD. The KLCI lacklustre trend underperformed ASEAN regional markets but outperformed some of the North Asia peers. Within Asia region, India, Philippines and Vietnam were best performers, advanced circa +25%, +23% and 18% YTD respectively while HSCEI, ASX200 and Nikkei 225 were underperformers, fell 4%, 1% and 0.7% YTD respectively.

MARKET OUTLOOK AND STRATEGY

Despite govt efforts in fuel subsidy rationalization, recent petro hike of RM0.20/liter and potential impact of GST implementation in early 2015, we maintain our positive view on equity market and envisage bottoming of corporate earnings downgrade and expect gradual recovery in 4Q2014.

On regional front, latest HSBC Markit China manufacturing PMI came in unchanged at 50.2 in Sept vs 50.2 in Aug and 51.7 in July, while the non-manufacturing PMI weaken slightly to 54.0 in Sept vs 54.4 in Aug. We envisage China macro data continue to be mixed with soft patch due to Chinese govt determination to rebalance the economy. We expect the Chinese govt will react with selective/targeted easing should cyclical weakness threaten GDP growth and unemployment. EM reliance on China growth for commodities export may face headwinds in 2014.

On sector basis, we continue to favour consumer, tech, and industrial while selectively bullish bias on infra related construction stocks. We foresee 2014 to be a reform year for regional economies and Malaysia govt to rollout targeted infra projects to spearhead the economy and continue its reform agenda including subsidy rationalization which augur well for the economy. Increase market volatility globally will create capital misallocation and outflow of funds from emerging markets, thus misprice securities from fundamental. We remain cognizant of prevalent risks but look into adding bombed-out good fundamental stocks to enhance alpha.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 September 2014, the Volatility Factor (VF) for this fund is 12.0 and is classified as "Very High". (source: Lipper) "Very High" includes funds with VF that are above 13.0 (source: Lipper) The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks for the Fund are liquidity of underlying investments, interest rate risk, credit / default risk, inflation / purchasing power risk, equity investment risks such as market risk and particular security risk. These risks and other general risks are elaborated in the Master Prospectus.
