This Fund aims to provide investors with a high level of liquidity whilst providing reasonable returns by investing in low risk investments that complies with Shariah requirements.

### MANAGER'S COMMENTS

#### MARKET REVIEW

Mixed views of another 25 basis point interest rate hike in the upcoming Monetary Policy Meeting (“MPC”) meeting on 18 September seems to create uncertainty among Sukuk investors. Additionally a much stronger 2Q GDP print and higher inflation number provide a much stronger reason for interest rates normalization at least in the first half of 2015. Hence, there were some profit taking activities towards end August after a strong rally in the longer end of the curve by as much as 25bps against early of the month.

The benchmark yields moved slightly higher compared to end-July levels. At close, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS were traded at 3.50% (July: 3.47%), 3.68% (3.66%), 3.81% (3.75%), 3.91% (3.89%), 4.21% (4.21%), 4.30% (4.29%) and 4.64% (4.64%) respectively. On the other hand, performance of the Government Investment Issues (“GII”) were rather range bound with the 3-, 5-, 7-, 10-, 15-year and 20-year benchmark yields transacted at 3.61% (July: 3.60%), 3.79% (3.78%), 4.00% (4.01%), 4.14% (4.14%), 4.39% (4.40%) and 4.61% (4.58%) respectively.

For the period under review, the Money Market rates post OPR hike rose by 25-35bps across the tenures. As of end of August, the 1, 3 and 6 months rates were offered between 3.55%, 3.70% and 3.80% respectively.

#### ECONOMIC REVIEW AND OUTLOOK

Malaysia’s inflation gained in the month of July as prices of transport, food, housing and utilities increased. Consumer prices rose 3.2% from a year earlier after rising 3.3% in June. Malaysia’s industrial production growth for June accelerated to 7.0%, its fastest pace in 11 months, after hitting a high of 10.8% in July last year. Meanwhile, GDP target will remain at 5.2%-5.3% in FY14 based on the strong growth in 1Q14. Bank Negara Malaysia (BNM) has raised the OPR by 25bps during the July MPC, which was in line with our expectations. BNM had highlighted that growth will remain anchored by domestic demand with additional support from the improved external environment.

#### MARKET OUTLOOK AND STRATEGY GOING FORWARD

The latest MPC statement assessment on inflation is still “above long-run average”, though demand pressure is “contained”. Consumer prices will increase this year and into 2015 when the government implements a new tax on goods and services. BNM will monitor the degree of second round price effects to the overall growth of the economy. Recent strengthening of Ringgit had evidently increase foreign buying into local MGS market as rates start to rise. All in all, we still see BNM to keep rates steady at 3.25% throughout the year barring any negative surprise in financial imbalances.

In view of the above, we are inclined to stay cautious and prefer to be defensive. We aim to stay fully invested in short to medium term Islamic Money Market placements.

#### DISCLAIMER:

Based on the fund’s portfolio returns as at 15 August 2014, the Volatility Factor (VF) for this fund is 0.1 and is classified as “Very Low”. (source: Lipper) “Very Low” includes funds with VF that are not more than 1.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund’s portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet (“PHS”) highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 1 December 2013 and its supplementary(ies) (if any) (“the Master Prospectus”) before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks for the Fund are interest rate risk, credit / default risk and inflation / purchasing power risk. These risks and other general risks are elaborated in the Master Prospectus.
