RHB-OSK INCOME FUND 2

This Fund aims to provide investors with higher than average income returns compared to fixed deposits over the medium to long term period through investments in a portfolio of predominantly quality fixed income securities with minimum risk to capital invested.

MANAGER'S COMMENTS**MARKET REVIEW**

Lower oil price posted a new concern for oil exporting country such as Malaysia. Ringgit weakened from 3.2835 at end-October to 3.3685 at end-November. Likewise, the Malaysian Government Securities ("MGS") also bearish flattened, with short-end yield increased by 6 – 12bps. At close, the 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS were traded at 3.56% (October: 3.50%), 3.75% (3.63%), 3.77% (3.77%), 3.86% (3.83%), 4.14% (4.15%), 4.24% (4.25%) and 4.59% (4.63%) respectively. On the other hand, Government Investment Issues ("GII") performed better with overall yield traded unchanged to 3 bps lower compared to last month. The 3-, 5-, 7-, 10-, 15-year and 20-year benchmark yields transacted at 3.67% (October: 3.67%), 3.79% (3.80%), 3.99% (4.00%), 4.12% (4.12%), 4.36% (4.39%) and 4.55% (4.57%) respectively.

The 2 auctions in November – reopening of 10-year MGS (MGS 07/24, RM3.5bil, average yield 3.854%) and reopening of 5-year MGS (MGS 10/19, RM3.5bil, 3.721%) received only moderate bid-to-cover ratio of 1.56x and 1.79x respectively. This is likely due to the weak Ringgit sentiment in the market.

On the domestic economic front, BNM kept Overnight Policy Rate ("OPR") at 3.25% as widely expected. November was the last Monetary Policy Committee ("MPC") committee meeting for the year and the Central Bank has only delivered 25bps of policy rate hike throughout 2014, contrast with 50bps hike expected in the beginning of the year. September Trade surplus expanded more than expected on a sequential fall in imports. Export rose 2.0% YoY (August: 1.7% YoY), while import slowed to 1.1% YoY. Trade surplus for September was reported at RM9.33bil (August: RM 3.86bil). The increase in exports was due to higher machinery orders to US and China, which marked a sequential expansion since August. 3Q2014 GFP growth slowed to 5.6% YoY (2Q2014: 6.5% YoY) on weaker net exports as well as gross investments. Current Account surplus also narrowed sharply to RM7.6bil (or 2.8% of GDP), from RM16.0bil (or 6.1% of GDP) reported in 2Q2014. Lastly, October CPI only grew 2.8% YoY (September: 2.6% YoY, consensus: 3.0% YoY) as RON95 and diesel price was adjusted higher for the month.

DISCLAIMER:

Based on the fund's portfolio returns as at 15 November 2014, the Volatility Factor (VF) for this fund is 1.1 and is classified as "Very Low". (source: Lipper) "Very Low" includes funds with VF that are not more than 1.1 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to was dated 30 June 2014 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2014.

A Product Highlights Sheet ("PHS") highlighting the key features and risks of the Fund is available and investors have the right to request for a PHS. Investors are advised to obtain, read and understand the PHS and the contents of the Master Prospectus dated 26 October and its supplementary(ies) (if any) ("the Master Prospectus") before investing. The Master Prospectus has been registered with the Securities Commission Malaysia who takes no responsibility for its contents. Amongst others, investors should consider the fees and charges involved. Investors should also note that the price of units and distributions payable, if any, may go down as well as up. Where a distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV. Any issue of units to which the Master Prospectus relates will only be made on receipt of a form of application referred to in the Master Prospectus. For more details, please call 1-800-88-3175 for a copy of the PHS and the Master Prospectus or collect one from any of our branches or authorised distributors.

The Manager wishes to highlight the specific risks of the Fund are higher level of risk than a portfolio diversifying its holdings across several asset classes, interest rate fluctuations, creditworthiness of the debt issuers, liquidity risk and risk of inflation. These risks and other general risks are elaborated in the Master Prospectus.
